"Mildoscientos", a portmanteau word that translates from Spanish into "Twelve Hundred", is a biographical book following the motorcycle journey of its author, Gianni Fontana, from Brooklyn, NY to Buenos Aires, Argentina. Gianni spent 5 months on his Harley-Davidson Sportster 1200 riding the 22,000 miles all the way down to the last capital city of the Americas. He is a music producer who worked in the industry for over 20 years; now towards the end of his 30's and lacking creative interest, after a 4-year love affair gone sour, and feeling misplaced living in an ever changing New York City, he embarked on a journey of liberation, an inner search for his original self and his future one. As he succeeded in reaching his geographical goal without accidents, he also found his creative self again and during the trip he went back to writing his own songs, instead of just

producing others like he's been doing for the past few years. The trip started in November 2012, riding out of a Manhattan restaurant among the cheers of a few friends who came to say goodbye for possibly the last time. Gianni crossed 17 countries, through the crime-infested northern Mexico and Venezuela, the derelict roads of Honduras and Bolivia to the exotic beaches of Puerto Viejo and Copacabana. He did it on the least popular motorbike amongst travel bikers: a very American Harley-Davidson. In 1957, The Motor Company, as they call Harley-Davidson in Milwaukee, was in trouble. The big twins were too big, the small two-stroke single was too small, and a surge of imports had taken the sporting market from the under-powered Model K. It was time for something new and different. It was time for the Sportster. Never has a motorcycle been more aptly named. The Sportster kept the K's best features, borrowed the improvements of the imports, threw in some homemade hot rodding, and before you could say Superbike-a term invented to describe the XLCH-the Sportster was making history, setting sales and speed records, and introducing people to the sport of motorcycling and the mystique of Harley-Davidson. The history is still going on. This book tells how and why, in sequence, from the circumstances and models that preceded the XL through to the 1200 Evo, with its five speeds and belt drive. On the way, there are in-depth looks at the race-ready XLC that began the Superbike era (and took even the factory by surprise), at the radical Cafe Racer and super-sport Buell, and at the price-buster XLX that taught the imports the value of the dollar. Each Clymer manual provides specific and detailed instructions for performing everything from basic maintenance and troubleshooting to a complete overhaul of the machine. This manual covers the Harley-Davidson XL Sportster built from 2014 to 2017. Do-it-yourselfers will find this service and repair manual more comprehensive than the factory manual, making it an indispensable part of their tool box. Harley-Davidson's XR-750 has ruled dirt-track racing for more than two decades. In fact, no other race car or motorcycle has won as many races over such a long time period. And the victories continue today. This is the story of the legendary XR-750 from its development in 1970, when it was created to replace the aging KR. The first XRs used iron cylinder heads and barrels-and were painfully slow. By 1972, the motorcycles were redesigned with aluminum heads and barrels, and the XR-750 took home the trophies. Found here is the development of the XR-750 with a technical analysis of the complete motorcycle, detailing specifications, modifications, innovations, and aftermarket components. This is also the story of the men who designed, tuned and raced the XR-750. It was their engineering skill, iron-willed riding and tuning secrets that made the motorcycle a winner. The ranks include Jay Springsteen, Dick O'Brien, Bill Werner, Scott Parker, Cal Rayborn, Mert Lawwill, the Brelsford brothers, Gary Scott, Ricky Graham, and more. The book is divided into three parts, the motorcycle's development, the season-by-season race championships, and how the pros make the bikes go-and go fast. More than 300 photos tell the inside story of the XR-750 on the dirt track, the XR-750 and XR-1000 on the street and XRTT on the road-race circuits. Girdler is a former "Cycle World" editor and author of many books including "Harley-Davidson Racing 1934-1986" and "Harley-Davidson Sportster. "
