Now, he offers step-by-step instructions and plenty of friendly advice to help you join in the fun and get real satisfaction from digital photography. Let me guess: You recently got a new DSLR camera, and in all your excitement, you tossed the manual somewhere and then went out to take pictures. Of course, similar to a "point-and-shoot" camera, anybody can take a fairly decent image using the Auto setting, because the camera does all of the work for you! However, with Auto mode, you'll soon find yourself frustrated at the lackluster quality the photographs have. Auto mode simply doesn't give you enough control over your image. Believe it or not, photography is actually a hard skill to learn. The biggest obstacle is that people often feel daunted by all of the seemingly complex functions, buttons, and dials available to them on a DSLR camera. And this is where I come in to help! I've written this short book as an easy-to-understand guide on how to use the manual functions on your camera.

Regardless of the brand of your camera, the goal of this book is to take the fear out of all the unknown buttons and features. As you'll come to find out, once you've gotten control over your camera, you'll begin to have more control over your photographs. Your frustration with your camera will subside, and even if you consider yourself an amateur or a beginner, your images will take on a much more professional, technical quality. So if you're ready to impress yourself (and get your money's worth from your expensive camera) by becoming a savvy DSLR photographer, then let's get started! In 1970 at the height of the Cold War, the young Sandhurst-trained Sultan Qaboos of Oman, with secret British military backing, took on communist insurgents in a fierce but little known war. Along with regular British Army and contract officers, the Special Air Service played a key role in this bitterly fought but ultimately successful campaign. The value of winning the Hearts and Minds of the local population was quickly recognised and this is where a select band of Royal Army Veterinary Corps officers came in. The local economy was a primitive one based on agriculture, and the author, freshly qualified and, by his own admission, somewhat naive, found himself solely responsible for the veterinary care of a territory the size of Hungary. Attached to A Squadron, 22 SAS, Andrew Higgins learned how to respond to the Jebali peoples love and concern for the animals that provided their livelihood goats, camels, sheep and most importantly their cattle. Then there were the Sultans horses, pedigree dogs, exotic birds and even bears and hyenas. His first-hand experiences and anecdotes of life dealing with every level of Omani society, from the Ruler and his Court to the humblest refugees and their varied livestock make for wonderfully atmospheric and amusing reading. It also provides a thoughtful insight into the value of hearts and minds campaigns in other military operations where the support of the civilian population is crucial to success. With the SAS and Other Animals is an unusual and potent mix of Special Forces action and veterinary experiences. Readers may well conclude that it really shouldn't have happened to a vet even in a desert war!
