UNDERSTAND TO BE ABLE TO SELL A VEHICLE OR TO SELL MORE VEHICLES TO CUSTOMERS AND CREATE A SATISFIED AND RELIABLE LONG-TERM CUSTOMER BASE. As you are reading, remember this: "there is nothing wrong with making a lot of money, as long as you make it the right way" AND "it's not what you do, but rather how you do it." I have been a successful car sales person for about 13 years and a Licensed Car Dealer for approximately 11 years. I have owned and ran my own dealership for about 11 years as well. Therefore, I know this business very well through my own experiences and can tell you what it takes to be successful in this business and how to maximize your money making possibilities. This very short book will give you the ABSOLUTE confidence, from the beginning to the end of the car-selling process, of how to sell a vehicle and make thousands of dollars and create a very satisfied and reliable long-term customer base that will serve you well for a long time. This book is ABSOLUTELY the way to minimize the price you pay for a vehicle; and an ABSOLUTE way to make sure you acquire quality vehicles; and an ABSOLUTE way to sell more vehicles; and an ABSOLUTE way to maximize the profit you make at the sale of the vehicle; and an ABSOLUTE way to get more customers; and an ABSOLUTE way to ensure you create a very satisfied and long-term customer base that will serve you well for a long time. If you do not know these concepts and car selling tips, you will CERTAINLY pay more for the price of the vehicle; and/or you will be selling low quality vehicles and thus sell less vehicles; and/or you will DEFINITELY make less profits; and you will not have many satisfied customers; and you will not be able to create a long-term satisfied customer base. FURTHER, this book is short and straight to the point. This book is also very simple to follow and all the concepts are disclosed in a way that is manageable so you can master them easily and quickly and commit them to your memory or strategy and go into the car selling process with extreme CONFIDENCE and make a lot of money and have a very happy and satisfied long-term customer base. By now we all are aware that Dealers, Dealerships, Sales People, and Sellers of vehicle's make more when they sale the vehicle at a higher price. There is no secret that the seller's whole motivation is to sell a customer the vehicle at the highest price possible, and/or at the highest interest rates possible, and/or on the seller's terms. It is a very common practice in dealerships that the higher the sales person sells the vehicle for, the higher the sales person's commission! The higher the interest rate, the higher the sales person's commission! The more the sales person can convince the buyer to sign the contract closer to his terms, the higher the sales person's commission! Therefore, it should not be a surprise to you that if you were to change this "mindset" and you become a seller with the mindset to create a satisfied customer, then you would be well on your way to out-doing the competition. Thus, you need to gain the most knowledge and develop strategies and tactics to create a satisfied customer base. It's simple. No customers, No business!!! This is just common sense. The concepts, and the explanations of these concepts, will CERTAINLY put you at a better advantage and stimulate growth for your business. These concepts are a "must know." This book entails a very concise and short but thorough straight to the point step-by-step guide... latest book in The Clueless Series *Clueless About Cars*, focuses on something near and dear and unnerving for many of us: car repair and maintenance. For most of us, cars rank second only to houses in terms of major life expenses. A car is a statement of independence, a symbol of social status or financial success, a way to get from point A to B. First and foremost though, a car is a significant investment. So it only makes sense that car owners should want to protect their investments and make sure that they get the most mileage – figuratively and literally – out of their cars. In *Clueless About Cars* Lisa Christensen, licensed mechanic and diagnostic specialist, helps those new to the car game and seasoned pros alike become familiar with their vehicles and learn how to care for them. In simple, informative and often hilarious language, Christensen acquaints readers with the fundamental systems of the car. She covers the basics of preventative maintenance and offers advice on how to make a preliminary diagnosis when something goes wrong (and it always does!). She also provides tips to help car owners talk to their mechanic, how to diagnose a car's ticks, tocs, and knocks and how to perform basic do-it-yourself repairs. For the novice driver who doesn't know a hubcap from a gas cup, to the seasoned driver looking for a better sense of control, *Clueless About Cars* is a glove-box must! It headed the very first essay, or article, or tale, that I ever wrote on motor touring abroad, and all it implies will probably be ringing in my head when I write my last. One can never realise its meaning without a car. I expect the horses in the weary old rumbling coaches and diligences that used to bring invalids along the

unending roads of France to die by the shores of the Mediterranean found fresh courage and picked up their paces when they first sniffed the scented air, and saw far beneath them the glorious azure sea, the red cliffs, and the trees and flowers of the true South; one can still get something of the same sensation out of the railway carriage window to-day. "Tell me its pedigree and I'll tell you what kind of car it is!" According to legend, this pungent comment was made by the great Tazio Nuvolari when a manufacturer asked him to drive a new car in the German Grand Prix. West Germany's Auto Union products—the front-wheel-drive DKW 750 and the larger Auto Union S-1000 series—are direct descendants of the famous Auto Union racing cars that Nuvolari was later to drive to victory in the British and German Grand Prix races, and which literally cleaned up on the racing tracks of Europe before World War II ended peaceful competition between great automobile marques. These were the cars that would do 205 mph, weighed a mere 2,508 pounds, and were constructed with what one writer describes as an "unearthly kind of superior craftsmanship ..." (1961 - Keith Ayling)
