This book presents a collection of original research papers addressing the relationship between information systems (IS) and innovation. "Open", "Smart" and "Network" are three keywords that are currently guiding information systems (IS) innovation, enhancing IS potentialities

and their ability to support decision-making processes. The book discusses the relevance of these three new concepts in connection with technological and organizational innovations (i.e. cloud, smart technologies and networking), and the role they play in the development of accounting and management information systems. The book's primary aim is to investigate how these innovations could influence information systems (with a particular focus on accounting and management information systems) by enhancing their information potentialities and improving accounting methodologies, performance measurement systems, data management, information systems architectures, and external and internal reporting. The book is based on a selection of the best papers—original double-blind reviewed contributions—presented at the 2016 Annual Conference of the Italian Chapter of the Association for Information Systems (AIS). A Textbook of Cost and Management Accounting provides the students with thorough grounding in cost concepts, cost behaviour and methods, and techniques of cost and management accounting with an understanding of the uses and limitations of cost and financial data for managerial operations. The text of the subject matter has been presented in a student-friendly, simple and intelligible manner. Every discussion involving conceptual complexity is immediately illustrated by a numerical example. In addition, the book contains a liberal sprinkling of charts and diagrams so as to make the subject easily understandable and highlight its finer points. The subject matter has been organized on 'first things first' basis for its logical presentation that sustains interest. The approach of the book is examination oriented. Thus, a good number of problems and solutions have been included in its chapters. Theoretical and numerical questions have been mostly selected from various examinations. Objective type questions have been given to serve as self-test by students. This is an ideal book for self-study. An all-inclusive, ideal book for self-study, both for the students of Cost and Management

Accounting as well as working professionals. NOTE: You are purchasing a standalone product; MyAccountingLab does not come packaged with this content.
