A biography of the Mexican American author, Gary Soto, who writes children's books. "Authority and Desire" focuses on the complexity of political discourse in a selection of Shakespeare's Jacobean dramas and Racine's tragedies. Particular attention is paid to the relations dramatised between the transforming communities of the governing and the governed in these plays. This wide-ranging study reveals how the formulation of such relations is profoundly involved with the cultural theorising of authority (linked to the legitimising forces of caste, kinship, gender expectation, sanctification and so on), and with the politics of human desire stimulated by the cultural spectacles of power assertion. Essays in English and American language and literature. The Historical Dictionary of U.S. Latino Literature contains a chronology, an introduction, and a bibliography. The Coronado Expedition to Tierra Nueva is an engaging record of key research by archaeologists, ethnographers, historians, and geographers concerning the first organized European entrance into what is now the American Southwest and northwestern Mexico. In search of where the expedition went and what peoples it encountered, this volume explores the fertile valleys of Sonora, the basins and ranges of southern Arizona, the Zuni pueblos and the Rio Grande Valley of New Mexico, and the Llano Estacado of the Texas panhandle. The twenty-one contributors to the volume have pursued some of the most significant lines of research in the field in the last fifty years; their techniques range from documentary analysis and recording traditional stories to detailed examination of the landscape and excavation of campsites and Indian towns. With more confidence than ever before, researchers are closing in on the route of the conquistadors. In *Dust Bound for Heaven* Reinhard Hütter shows how Thomas Aquinas's view of the human being as dust bound for heaven weaves together elements of two questions without fusion or reduction. Does humanity still have an insatiable thirst for God that sends each person on an irrepressible religious quest that only the vision of God can quench? Or must the human being, living after the fall, become a "new creation" in order to be readied for heaven? Hütter also applies Thomas's anthropology to a host of pressing contemporary concerns, including the modern crisis of faith and reason, political theology, the relationship between divine grace and human freedom, and many more. The concluding chapter explores the Christological center of Thomas's theology. "The ethnography of Japan is currently being reshaped by a new generation of Japanologists, and the present work certainly deserves a place in this body of literature. . . . The combination of utility with beauty makes Kondo's book required reading, for those with an interest not only in Japan but also in reflexive anthropology, women's studies, field methods, the anthropology of work, social psychology, Asian Americans, and even modern literature."—Paul H. Noguchi, *American Anthropologist* "Kondo's work is significant because she goes beyond disharmony, insisting on complexity. Kondo shows that inequalities are not simply oppressive—they are meaningful ways to establish identities."—Nancy Rosenberger, *Journal of Asian Studies* A Study Guide for Gary Soto's "Mother and Daughter", excerpted from Gale's acclaimed *Short Stories for Students*. This newer version is easier to read and understand and enables a parallel, comparative study of both text versions. For both text versions, a Latin-based Hanyu Pinyin transcription is provided as well as a Chinese-English glossary and a Writing Practice section for all the traditional Chinese character forms used in both texts. The latest edition of an accessible and comprehensive survey of Native America In this newly revised third edition of *Native America: A History*, Michael Leroy Oberg and Peter Jakob Olsen-Harbach deliver a thoroughly updated, incisive narrative history of North America's Indigenous peoples. The authors aim to provide readers with an overview of the principal themes and developments in Native American history, from the first peopling of the continent to the present, by following twelve Native communities whose histories serve as exemplars for the common experiences of North America's diverse Indigenous nations. This textbook centers the history of Native America and presents it as flowing through channels distinct from those of the United States. This is a history of nations not merely acted upon, but rather of those that have responded to, resisted, ignored, and shaped the efforts of foreign powers to control their story. This new edition has been comprehensively updated in all its chapters and expanded with wider coverage of the most significant recent events and trends in Native America through the first two decades of the twenty-first century. *Native America: A History, Third Edition* also includes: A survey of pre-Columbian North American traditions and the various ways in which these traditions were deployed to comprehend and respond to the arrival of Europeans. In-depth examinations of how Native nations navigated the challenges of colonialism and fought to survive while marginalized behind the frontiers of European empires and the United States. Nuanced analyses of how Indigenous peoples balanced the economic benefits offered by assimilation with the cultural and political imperatives of maintaining traditions and sovereignty. An accessible presentation of American tribal law and the strategies used by Native nations to establish government-to-government relationships with the United States despite the repeated failures of that state to honor its legal commitments. Perfect for undergraduate and graduate students seeking a broad historical treatment of Indigenous peoples in the United States, *Native America: A History, Third Edition* will earn a place in the libraries of anyone with an interest in seeking an authoritative and engaging survey of Native American history. Originally published in 1991, this volume tackles the diverse teachings of the great psychoanalyst and theoretician. Written by some of the leading American and European Lacanian scholars and practitioners, the essays attempt to come to terms with his complex relation to the culture of contemporary psychoanalysis. The volume presents useful insights into Lacan's innovative theories on the nature of language and the subject. Many of the essays probe the importance of psychoanalysis for problems of signifier and referent in the philosophy of language; others explore the difficulties men and women have in negotiating the sexual differences that divide them. A major contribution to the new reception of Jacques Lacan in the English-speaking world, *Lacan and the Subject of Language* will challenge those who believe that they have already 'mastered' Lacanian thought. The insights offered here will pave the way for further developments. Challenges the prevailing view that mystical experience is shaped by language and culture and argues that mystical experience is a direct encounter with consciousness itself. Heron draws on post-structuralist notions of subjectivity, critical race and space theory, feminism, colonial and postcolonial studies, and travel writing to trace colonial continuities in the post-development recollections of white Canadian women who have worked in Africa. Following the narrative arc of the development worker story from the decision to go overseas, through the experiences abroad, the return home, and final reflections, the book interweaves theory with the words of the participants. She posits that the desire for development is about the making of self in terms that are highly raced, classed, and gendered. The construction of white female subjectivity is thereby revealed as contingent on notions of goodness and Othering, played out against, and constituted by, the backdrop of the North-South binary, in which Canada's national narrative situates us as the 'good guys' of the world. Desire, Jacques Lacan suggests, is a condition or expression of our wounded nature. But because such desire is also unconscious, it can be expressed only indirectly, for what we consciously desire is hardly ever what we really want. Desire makes itself known, but disguises its presence--appearing, for example, in unconscious but repetitive, and sometimes even self-destructive, patterns of behavior. Informed by the voices of Freud and Lacan regarding the nature of language and desire, *Inaugural Wounds* examines the ways in which five major nineteenth-century English writers explored the trajectories and shapes of desire. Arguing that we need to give to novels the same kind of close scrutiny we give to poetry, author Robert Lougy suggests that when we do so, we discover that they often astound us by the resonance and range of their language, as well as by their ability to take us to strange and haunting places. The five narratives examined--Charles Dickens's *Martin Chuzzlewit*, William Thackeray's *Journey from Cornhill to Grand Cairo*, Elizabeth Gaskell's *Ruth*, Wilkie Collins's *The Woman in White*, and Thomas Hardy's *Jude the Obscure*--testify to the mysterious origins of desire. Although each of the novels tells its own story in its own way, they share a fascination with the nature of desire itself. Drawing upon recent work that has challenged historicist approaches toward nineteenth-century British literature, Professor Lougy uses the insights of psychoanalysis to enable us to more fully appreciate the depth and power of these novels. Of great value to Victorian and psychoanalytic scholars, *Inaugural Wounds* will be useful for teaching undergraduates as well. The use of Information and Communication Technologies (ICT) to deliver psychological services has been emerging as an effective way of increasing individual access to mental health promotion, prevention, and treatment. This Special Issue brings together different contributions focusing on the acceptability and feasibility, (cost-)effectiveness, potentialities, and limitations of ICT-based psychological services for mental health promotion, prevention,

and treatment. In each paper, the implications for the implementation of ICT tools in different settings (e.g., primary care services) and for future research are discussed. \*\*Don't miss John Sandford's brand-new, pulse-pounding thriller, *Masked Prey*, available now\*\* His job is to hunt down criminals.
