The present volume, the first translation of Morkinskinna in any Language, makes this literary milestone available to a general readership, with introduction and commentary to clarify its position in the history of medieval Icelandic letters."--BOOK JACKET. In *Frontiers for Peace in the Medieval North. The Norwegian-Scottish Frontier c. 1260-1470*, Ian Peter Grohse offers an account of social and political relations in the frontier community of Orkney in the late Middle Ages. How did Norway become a highly

successful liberal democracy? Will its prosperity and stability last, or has modern history been an exception? Is the Norwegian experience based on luck, or has a part been played by clever politicians and sound institutions, including a well-functioning rule of law? How does Norway combine social democracy with a market economy, and extensive foreign trade? Since the 1970s, Norway has become an oil-producing giant in Northern Europe--how can that role be reconciled with the realities of climate change, and increasing awareness of that crisis? This highly engaging book introduces Norwegian political and economic history to a

broad audience, offering a deeper understanding of a country always looked upon with great interest, but perhaps not profoundly understood. The Norwegian Exception? takes the reader back through 200 years of state-building to explain Norway's current position as a top-ranking nation, and to consider its chances of keeping that status in the twenty-first century. In particular, it unpacks how Norwegian politics and governance have shaped the country's world-famous oil fund and unique relationship with the European Union. Leading historians Mathilde Fasting and Oystein Sorensen skilfully draw back

the curtain on the inner workings of the Norwegian 'utopia'. This study presents a unified, economic account of the intricate relationship between form, meaning and interpretation in the Norwegian nominal system - without reference to polysemy. It covers all kinds of nominal signs, i.e. nouns, adjectives, pronouns and determiners, as well as the conventionalised syntactic combinations between them. Among its central innovations is the introduction of the feature general number into Norwegian morphology. Inspired by transnational research on medieval state formation, this book presents a

comprehensive study of the political incorporation and subsequent judicial and administrative integration of Iceland, the Faroes, Shetland, and Orkney, into the Norwegian realm c. 1195-1397. This book is open access under a CC BY NC ND 4.0 license. This open access book discusses how Norwegian shipping companies played a crucial role in global shipping markets in the 20th century, at times transporting more than ten per cent of world seaborne trade. Chapters explore how Norway managed to remain competitive, despite being a high labour-cost country in an industry with global competition. Among the

features that are emphasised are market developments, business strategies and political decisions. The Norwegian experience was shaped by the main breaking points in 20th century world history, such as the two world wars, and by long-term trends, such as globalization and liberalization. The shipping companies introduced technological and organizational innovations to build or maintain a competitive advantage in a rapidly changing world. The growing importance of offshore petroleum exploration in the North Sea from the 1970s was both a threat and an opportunity to the shipping

companies. By adapting both business strategies and the political regime to the new circumstances, the Norwegian shipping sector managed to maintain a leading position internationally. The wooden holiday cabin, or hytte, is a staple of Norwegian life. Robert Ferguson, author of Scandinavians, explores the significance of a national icon in this charming, affectionate history. Turf-roofed and wooden-built, offering fresh air, breathtaking views and peaceful isolation, the wooden cabin home - or hytte - is a crucial part of Norwegian national identity. In 2016, Robert Ferguson and his wife bought a piece of land high up

in the Hardangervidda, and on it they built a cabin. As the cabin takes shape, Ferguson learns how native Norwegians have married a new-found urban affluence to their past as a tight-knit rural community, and confronts his own ideas about the dream-tradition of the hytte, drawing an affectionate but unsentimental portrait of Norwegian culture, society and landscape. 'Singular and captivating: the pursuit of a dream' Professor John Carey 'Illuminating' TLS 'An uncompromising journey into the dark cold north, to reveal the warmth that comes from deep community bonds' Tim Ecott The papers and research results presented

here have been prepared as part of the Integrated Basin Studies project. This project had the objective of studying the lithospheric and upper crustal processes governing the formation and evolution of extensional and foreland basins and to decipher the role of tectonics, sea level and sedimentary processes in the filling of such basins. The Dynamics of the Norwegian Margin module focused on the rifted sedimentary basins of the northern North Sea and off Mid-Norway. This prolific hydrocarbon province has an extensive industry and scientific database and offers a unique opportunity to study fundamental earth processes,

from failed rifting to crustal breakup and accretion of oceanic crust. A set of new models for basin formation and filling has been derived, including linking of sedimentary basin faulting to lower crustal deformation, signature and variability of syn-rift infill, correlation of mineralogy to seismic signature, nature and characteristics of volcanic margin formation and distribution of present-day stress field. The Hessdalen valley, Norway, is the world's #1 UFO hotspot; nowhere else

Describes how Norway has successfully managed its petroleum resources and the variety of policy tools that are available to states rich in natural resources, and how these tools can be adjusted to changing (domestic and international) contexts. This volume is the record of a three day symposium entitled "Organic Geochemistry in Exploration of the Norwegian Shelf", which was sponsored by the Norwegian Petroleum Society (Norsk Petroleumsforening)

and held at the Rogalands Regional College, Stavanger on 22-24 October 1984. Twenty-nine papers were presented, and all but one are published in full herein. The aim of the conference was to focus on the application of geochemical methods to the current and highly active exploration of the Norwegian offshore. Emphasis was on practical interpretation and case histories rather than laboratory methods and techniques, and a strong attendance was sought among geologists and seismic interpreters active in exploration in Norway and Northwest Europe generally. On all counts the symposium was a great success with a total

of 213 participants registered. In his opening address Mr Egil Bergsager, director of the Norwegian Petroleum Directorate, observed that during the 1970s petroleum geochemistry emerged from being a somewhat academic pursuit into a practical aid in exploration for hydrocarbons. This first stage, when many of the basic methods were developed, has now led in the 1980s to an expansion into applications in regional geological studies, including mathematical modelling of thermal history, hydrocarbon migration and basin development. Stepping Up to the Cold War Challenge: The Norwegian-American Lutheran

Experience in 1950s Japan describes the events that led to the Evangelical Lutheran Church (ELC), an American Christian denomination, to respond to General MacArthur's call for missionaries. This Church did not initially respond, but did so in 1949 only after their missionaries had been expelled from China due to the victory of communist forces on the mainland. Because they feared Japan would also succumb to communism in less than ten years, the missionaries evaded ecumenical cooperation and social welfare projects to focus on evangelism and establishing congregations. Many of the ELC missionaries were children

and grandchildren of Norwegian immigrants who had settled as farmers on the North American Great Plains. Based on interview transcripts and other primary sources, this book intimately describes the personal struggles of individuals responding to the call to be a missionary, adjusting to life in Japan, learning Japanese, raising a family, and engaging in mission work. As the Cold War threat diminished and independence movements elsewhere were ending colonialism, missionaries were compelled to change methods and attitudes. The 1950s was a time when missionaries went out much in the same manner that they did

in the nineteenth century. Through the voices of the missionaries and their Japanese coworkers, the book documents how many of the traditional missionary assumptions begin to be questioned. These 38 Norwegian folk and fairy tales of elemental mountain, forest and sea spirits, have been handed down through the generations by hinds and huntsmen, woodcutters and fisher-folk, who led hard and lonely lives amid primitive surroundings are, perhaps, among the most fascinating the Scandinavian countries have to offer. Not only are they meant to delight children, and this they do not fail to do. "Grown-ups" who also, who take

pleasure in a good story, will enjoy this book as well. Here you will find stories which are well told. Readers will enjoy the original legend of "Peer Gynt" as it existed before Ibsen gave it more symbolic meaning. You will also find a glowingly, beautiful picture of an Avalon of the Northern seas described in "The Island of Udröst." And what could be more human and moving than the tragic "The Player on the Jew's-Harp," or none more genuinely entertaining than "The King's Hares"? The thrill and fascination of black magic and mystery run through such stories as "The Secret Church," "The Comrade," and "Lucky Andrew." In "The Honest Four-

Shilling Piece" we have the adventures of a Norse Dick Whittington. "Storm Magic" is one of the most thrilling sea tales, bar none, ever written, but every story included in the volume seems to bring with it the breath of the Norse mountains. One cannot but believe that "The Book of Norwegian Fairy Tales" has an appeal for one and all, since it is a book in which fairy-tales mirror and reflect human yearnings and aspirations, human loves, ambitions and disillusionments, in an imaginatively festooned world. It is the translator's hope that those who may come to know this book will derive as much pleasure from its reading as it

gave him to translate it into English. Scroll up, grab this book, and take the first steps to get the most out of YOUR Norwegian Experience! Reproduction of the original: The Norwegian Fjords by A. Heaton Cooper Vijf sterren in de VN Thrillergids ***** Sheldon Horowitz tweeëntachtig jaar, ongeduldig en onredelijk voelt zich nog altijd schuldig over de dood van zijn zoon in Vietnam. Nu is hij net weduenaar, en wordt hij achtervolgd door geesten uit zijn verleden. Tijdens een verblijf bij zijn familie in

Noorwegen is Sheldon getuige van de moord op een vrouw en redt hij haar zoontje. Hij is vastberaden het jongetje te beschermen tegen de moordenaar en diens Balkanbende en samen slaan ze op de vlucht. Voor de Noorse politie is Sheldon gewoon een verwarde oude man. Maar in zijn hoofd is Sheldon helder. Door een combinatie van handigheid en durf weet Sheldon iedereen een stap voor te blijven in een hem onbekende omgeving. Maar wat hij niet doorheeft is dat de politie en ook de gangsters weten waar hij naar op weg is. Derek B. Miller is geboren in Boston en woonde in Israël, Engeland, Hongarije en

Zwitserland. Nu woont hij met zijn gezin in Noorwegen. `Een briljante, serieuze literaire thriller, scandi-noir, maar met een twist. The Times `Derek B. Millers mooie eerste roman is op het eerste gezicht een Scandinavische thriller, maar laat zich ook vergelijken met de meer literaire creaties van Saul Bellow en Philip Roth. Donny is, als eigenwijze, grofgebekte, wrokkige Jood, eigenlijk een Bellow-held die in een Noorse pageturner verzeild is geraakt. Een opmerkelijk zelfverzekerd debuut dat zowel een rijke psychologische studie is als een politieke parabel over de Amerikaanse neiging zich met het buitenland te bemoeien, en een ontroerend verhaal over de

laatste kans van een oude man om met zijn verleden in het reine te komen. The Sunday Times `Een schitterende roman: bedachtzaam, complex, ontroerend en heel erg grappig. Sydney Morning Herald `Millers aangrijpende debuut is een ongewone, hybride roman, deels politie thriller, deels sociaal-politieke verhandeling en deels existentiële beschouwing. Kirkus This work presents eight studies of different but interrelated aspects of parliamentary government in post-war Norway. Split into three sections, it focuses on the formation of government, organization of parliament and the changing relations between

parliament, executives, and organized interests. This is a history of the Norwegian Intelligence Service (NIS) during the Cold War, based on its secret archives. The author describes a service that grew from a handful of specialists in 1946 to a multi-faceted organization with a personnel of about 1000 by the end of the 1960s. This white paper is part of a series that promotes knowledge about language technology and its potential. It addresses educators, journalists, politicians, language communities and others. The availability and use of language technology in Europe varies between languages. Consequently, the

actions that are required to further support research and development of language technologies also differ for each language. The required actions depend on many factors, such as the complexity of a given language and the size of its community. META-NET, a Network of Excellence funded by the European Commission, has conducted an analysis of current language resources and technologies. This analysis focused on the 23 official European languages as well as other important national and regional languages in Europe. The results of this analysis suggest that there are many significant research gaps for each

language. A more detailed expert analysis and assessment of the current situation will help maximise the impact of additional research and minimize any risks. META-NET consists of 54 research centres from 33 countries that are working with stakeholders from commercial businesses, government agencies, industry, research organisations, software companies, technology providers and European universities. Together, they are creating a common technology vision while developing a strategic research agenda that shows how language technology applications can address any research gaps by 2020. The

study provides an overview of the Norwegian national innovation system with a special focus on SMEs and their use of the intellectual property system. The study provides valuable empirical data on patent and trademark applications by size, location and sector. The methodology and analysis used in the study and its conclusions and recommendations, while focusing on the Norwegian situation, will be of great interest to all those concerned with ensuring that SMEs are able to make the most effective use of the tools available to them through the intellectual property system. Three weeks before the battle of Hastings,

Harold defeated an invading army of Norwegians at the battle of Stamford Bridge, a victory which was to cost him dear. The events surrounding the battle are discussed in detail.
