In this groundbreaking work, Robert Sternberg opens the book of love and shows you how to discover your own story--and how to read your relationships in a whole new light. What draws us so strongly to some people and repels us

from others? What makes some relationships work so smoothly and others burst into flames? Sternberg gives us new answers to these questions by showing that the kind of relationship we create depends on the kind of love stories we carry inside us. Drawing on extensive research and fascinating examples of real couples, Sternberg identifies 26 types of love story--including the fantasy story, the business story, the collector story, the horror story, and many others--each with its distinctive advantages and pitfalls, and many of which are clashingly incompatible. These are the largely unconscious preconceptions that guide our romantic choices, and it is only by becoming aware of the kind of story we have about love that we gain the freedom to create more fulfilling and lasting relationships. As long as we remain oblivious to the role our stories play, we are likely to repeat the same mistakes again and again. But the enlivening good news this book brings us is that though our stories drive us, we can revise them and learn to choose partners whose stories are more compatible with our own. Quizzes in each chapter help you to see which stories you identify with most strongly and which apply to your partner. Are you a traveler, a gardener, a teacher, or something else entirely? Love is a Story shows you how to find out. A comprehensive and practical textbook in the field of intellectual property licensing. This book highlights the best new interdisciplinary research on the theory and practice of cosmopolitanism, with a special focus on the cosmopolitan literatures of Europe, Asia, Africa, and North America, from medieval times to the present. From epic to limerick, novel to anecdote, literary narratives engage and entertain us. From autobiography and

biography to accounts of familial generations, narratives define communities. Myths and histories loom large in religious traditions as well. Recently, the importance of narrative to ethics and religion has become a pervasive theme in several scholarly disciplines. In the essays presented here, a distinguished roster of scholars addresses a range of issues associated with this theme, focusing especially on questions concerning narrative's contribution to knowledge.

Privileged Presence is a collection of more than 50 stories that capture both the medical and emotional aspects of the health care experience through tales from those who have been there, and offers powerful messages about the essential ingredients of "good" health care: respect, compassion, collaboration, open and honest communication, family involvement, and flexibility and responsiveness to individuals and their needs. This updated second edition uses real-world experiences recounted by patients and their families, nurses, doctors, and other health care professionals to illustrate what works and what doesn't and what increases or diminishes people's sense of confidence and well-being. A major re-evaluation of Boccaccio's status as literary innovator and

cultural mediator equal to that of Petrarch and Dante. Moeller conveys the complicated story of how West Germans recast the past after the Second World War. He demonstrates the 'selective remembering' that took place among West Germans during the postwar years: in particular, they remembered crimes committed against Germans. > First published in 1997. Routledge is an imprint of Taylor & Francis, an informa company. This comprehensive account of Huckel ' s career examines his scientific work and his key role in the emergence of quantum chemistry as an independent discipline. It also covers his clash with Linus Pauling over the properties of the benzene molecule. Where are the origins of chemical ideas? How did the pioneers in chemistry recognize the fundamental intellectual issues of their time? What skills of reasoning and experiment did they use to solve these problems? How did the circumstances of personality and competition influence their careers and scientific accomplishments? If we can answer these questions, we may be able to improve our own chances of success in research. »This is a marvelous book of people and chemical ideas! The author, Jerry Berson, is known as a chemical stylist, a physical organic chemist possessed of the highest analytical powers. In a unique approach to the history of chemistry (indeed the history of science) he brings that style, as well as his insider's knowledge and a perceptive sensitivity to the societal setting of chemists, to the analysis of some key chapters in modern organic chemistry.« Roald Hoffmann, Nobel Laureate One of the very few books that speaks knowledgeably and compassionately about both spiritual and psychological aspects of divorce, Ending Marriage, Keeping Faith is an

invitation to experience even the pain and confusion of divorce as a spiritual journey rather than an absolute ending. Thousands of readers have said that this book was the one thing they read that gave them both understanding and hope in the dark hours of their divorce experience. Dr. Nichols challenges much of the conventional wisdom about divorce, both religious and psychological, building the case that divorce can be a growth pilgrimage with a fundamental spiritual direction, reassuring landmarks, companionship along the way, and finally a safe ending. J. Randall Nichols' book is one of the fruits of his own painful but re-creative divorce experience, and he has written it to provide the kind of hope, insight, and guidance he could not find elsewhere to others like himself. "Funny, touching and infused with wonder, as all love stories should be."--San Francisco Examiner

1 and 2 Kings unfolds an epic narrative that concludes the long story of Israel's experience with institutional monarchy, a sequence of events that begins with the accession of Solomon and the establishment of the Jerusalem temple, moves through the partition into north and south, and leads inexorably toward the nation's destruction and the passage to exile in Babylon. Keith Bodner's *The Theology of the Book of Kings* provides a reading of the narrative attentive to its literary sophistication and theological subtleties, as the cast of characters - from the royal courts to the rural fields - are variously challenged to resist the tempting pathway of political and spiritual accommodations and instead maintain allegiance to their covenant with God. In dialogue with a range of contemporary interpreters, this study is a preliminary exploration of some theological questions that arise from the Kings narrative, while inviting contemporary communities of faith into deeper engagement with this enduring account of divine reliability amidst human scheming and rapaciousness. This collection of work at the intersection of cultural studies and contemporary political theory brings together thinkers from both traditions. Challenging the terms that have shaped culture wars since the 1980s, the essays reject the accusations of the right that everything is political, and of the left that politics is everything. They respond with an alternative, with an

explanation of processes of politicization and culturalization that asks, "what does it mean for something to be political?" Includes entries for maps and atlases. Astronomer and science writer David Whitehouse takes us on a journey through the evolving cosmos as he considers humankind's place in the universe - and how our survival depends on otherworldly perspectives. From the Earth to the depths of outer space, this inspiring book shows how human evolution has been intertwined with the workings of the cosmos from the very beginning, and what the far-distant future may hold, both for the universe and for ourselves. Given enough time, Whitehouse contends, we must communicate with intelligent aliens whose divergent perspective will transform our understanding of the universe. First contact may even come sooner than we think. We have already transmitted signals towards promising exoplanets. If, say, Gliese 581d harbours life, the return signal could reach us in 2051. Drawing the thread of human consciousness from the cave to the cosmos, the acclaimed author of *Apollo 11: The Inside Story* charts our future journey to the end of space and time and considers whether something of humanity could remain at the end of it all.
