ABC Animals!: A Scanimation Picture Book May 03 2021 The timeless appeal of alphabet books meets the patented technology of Scanimation. A National Parenting Product Awards (NAPPA) winner! Scanimation is a state-of-the-art animation process that creates the illusion of movement in each picture. In terms kids can relate to, it's like a video without a screen. ABC Animals presents the alphabet as it's never been seen before. In a romping, stomping journey from A to Z, watch the Alligator snap, the Bats swooping, the Camel trot. There's L for the Lion proudly prowling along, and M for the Mouse scurrying inside his wheel. And it all culminates in the largest Scanimation image yet: Z, for Zoo, where all the animals gather to play. Each page is a marvel that brings animals, along with one shining star, to life with art that literally moves. It's impossible not to flip the page, and flip it again, and again, and again.

A Transnational History of the Australian Animal Movement, 1970-2015 Dec 18 2019 This book offers the first transnational historical study of the creation, contention and consequences of the Australian animal movement. Largely inspired by Peter Singer and his 1975 book Animal Liberation, a new wave of animal activism emerged in Australia and across the world. In an effort to draw public and media attention to the plight of animals, such as the rearing of pigs and poultry in factory farms and the export of live animals to the Middle East and South East Asia, Australian activists were often innovative and provocative in how they made their claims. Through lobbying, disruptive methods, and vegan activism, the animal movement consistently contested the politics and culture of how animals were used and exploited. Australians not only observed and learnt from people and events overseas, but also played significant international roles. This book examines the complex and conflicting consequences of the animal movement for Australian politics, as well as its influence on broader social change.
