Manual of Pediatric Intensive Care Jul 15 2022 The Manual of Pediatric Intensive Care distills the salient information required to provide state-of-the-art care for the acutely ill and injured child into a concise, readily useful guide. Providing timely and appropriate care is a daunting challenge for frontline caregivers, early response and transport teams and pediatric and critical care trainees. This manual delivers the basic information and practical advice needed by those who provide urgently needed care to children in a format that occupies the middle ground between the voluminous, highly detailed textbook and the 'to do' lists that provide no physiological background for the approach presented. An introduction for beginners and a valuable aid for those already engaged in the care of acutely ill children, the Manual of Pediatric Intensive Care comprises contributions from specialists from around the world, including doctors, nurses, pharmacists and respiratory therapists.

Infectious Disease Epidemiology Dec 16 2019 Infectious Disease Epidemiology is a concise reference guide which provides trainees and practicing epidemiologists with the information that they need to understand the basic concepts necessary for working in this specialist area. Divided into two sections, part one comprehensively covers the basic principles and methods relevant to the study of infectious disease epidemiology. It is organised in order of increasing complexity, ranging from a general introduction to subjects such as mathematical modelling and sero-epidemiology. Part two examines key major infectious diseases that are of global significance. Grouped by their route of transmission for ease of reference, they include diseases that present a particular burden or a high potential for causing mortality. This practical guide will be essential reading for

postgraduate students in infectious disease epidemiology, health protection trainees, and practicing epidemiologists.

Paediatric Palliative Medicine Aug 24 2020 Looking after children with life-limiting conditions is very difficult for both parents and health care professionals. This second edition of Paediatric Palliative Medicine is full of easily-accessible, detailed information, and covers all aspects of the care of children with life-limiting illnesses. It is designed to equip clinicians with the knowledge, and its evidence base, to improve clinical care. Using the bestselling Oxford Specialist Handbook format to deliver practical and concise information, this handbook facilitates bedside delivery of effective palliative medicine to children. It includes a quick reference drug formulary and detailed information on medical conditions and symptom control. There are also specific management plans to guide professionals, whether the child is in their own home, in a hospital, or a hospice. Many children with long term conditions have symptoms which need management, and the principles of palliative care for children need to be known by all who are involved in their care. The unique significance of this handbook is its capacity to guide professionals who have not trained or had experience of caring for the dying child, as well as for students and trainees interested in paediatric palliative care. Children's palliative medicine encompasses symptom control but is not limited to it. This handbook also provides a wealth of information on the philosophy and models that support delivery of palliative medicine to children, as well as the learning and coping skills required in palliative care. Fully updated with an expanded formulary and a new chapter on the intensive care unit, this new edition continues to be the authoritative reference tool in paediatric palliative care.

How to Talk to Your Child's Doctor Sep 24 2020 In this illuminating guide to communicating with your child's doctor, pediatrician Christopher M. Johnson shows parents how to talk more effectively to their doctors about their child's health.

[A Practical Guide to Palliative Care in Paediatrics](#) Jan 17 2020 This ebook is a practical guide to all of the issues relating to the care of a child or young person with a life limiting condition. It aims to empower clinicians to care for children at home or as close to home as possible. It is a national resource and a major contribution towards supporting dying children and their families to have the best quality of life. Sections include psychosocial considerations, symptom management, the dying process, bereavement and ethics. New sections for this edition include perinatal palliative care and quality improvement in paediatric palliative care. The booklet includes a number of appendices including commonly used drugs and doses. The booklet where possible tries to be evidence based, and reflects best practice guidelines for the Australian and New Zealand context.

[Critical Care Pediatric Nephrology and Dialysis: A Practical Handbook](#) Apr 12 2022 This book covers all key aspects of critical care in pediatric nephrology, including acute dialysis in sick children. It also provides detailed protocols for managing fluid and electrolyte balance and dialysis in children in intensive care. In addition, this quick guide discusses innovations in pediatric renal replacement therapy technologies, such as plasma exchange, CARPEDIEM, NIDUS and aquadex. This is a go-to book for intensivists, physicians and trainees working in pediatric intensive care units.

Je baby's eerste jaar voor dummies / druk 1 Feb 16 2020

Children in Intensive Care Dec 20 2022 Written in a friendly, no-nonsense, style, Children in Intensive Care is a quick reference guide to the management of the acutely ill child in the hospital, or pre-hospital, setting. Fully updated throughout and rich with useful 'Alert' boxes and tables - to make learning and reference easy - this handy publication covers a broad range of essential topics such as drug dosages and compatibilities and normal reference ranges as well as harder to find information such as chest X-ray interpretation and troubleshooting technical equipment. Compiled from daily 'on the job' collation of useful facts and figures, this manual also offers practical advice about important non-acute issues such as infection control, common childhood diseases and child protection as well as new findings on the management of sepsis, the collapsed child and care of the child following spinal surgery. With over 10,000 copies sold, this book is an absolute must for any clinician involved with the management of critically ill children, whether it be on the wards, in theatres, high-dependency or intensive care units, as well as during retrieval and in A&E. Information

presented in quick reference format, with accompanying reference tables, to facilitate on-the-spot usage Advanced Life Support Group algorithms provide safe and easy-to-follow protocols to the management of emergency situations Contains input from a broad range of paediatric specialists - intensivists, anaesthetists, haematologists, oncologists, air ambulance physicians and retrieval nurses, pharmacists, specialist dieticians, and respiratory physiotherapists - to ensure full coverage and accuracy of information Contains helpful 'Quick Guide' and 'Warning' boxes to provide key information at a glance, while helpful mnemonics assist with learning Contains chapters on normal child development, safe-guarding children and young people, and patient transport Perfect for use on the wards, theatres, high-dependency units and intensive care units as well as during retrieval and A&E Ideal for newcomers and experienced staff alike, whether they be junior doctors or nursing staff Additional authorship brings the expertise of Marilyn McDougall, a Senior Paediatric Intensive Care Consultant Contains brand new chapters - oncology emergencies and pain & sedation - as well as the latest information on topics including sepsis and the collapsed neonate, and care of children after spinal surgery Comprehensively expanded cardiac chapter presents new surgical approaches as well as practical tips on pacing, care of chest drains and basic echocardiograph terminology Drug chapter now includes reversal agents, new drug profiles and an updated compatibilities chart Expanded artwork program explains clinical concepts and practical procedures

Pediatric Critical Care Study Guide Dec 28 2020 This is the first comprehensive study guide covering all aspects of pediatric critical care medicine. It fills a void that exists in learning resources currently available to pediatric critical care practitioners. The major textbooks are excellent references, but do not allow concise reading on specific topics and are not intended to act as both text and study guide. There are also several handbooks available, but these are usually written for general pediatric residents and lack the advanced physiology and pathophysiology required for the higher level pediatric critical care practitioner

Practical Approach to Pediatric Intensive Care Dec 08 2021 This is the third edition of this comprehensive guide to the practical aspects of paediatric intensive care, with contributions from various international authors. 12 sections, spanning over 1000 pages, cover basic practical and surgical issues in paediatric intensive care, as well as conditions specific to various systems of the human body, including respiratory, circulatory neurological, gastroenterological (digestive) and hepatological (liver, gallbladder, pancreas) systems. The penultimate section is on environmental injuries, including thermal burns, heat disorders and electric shock, and the book concludes with miscellaneous practical aspects of paediatric intensive care, such as quality improvement in the PICU (paediatric intensive care unit), and simulation based training and drugs in the PICU. Included in this new edition are recent resuscitation guidelines (AHA PALS, 2010) and international 'surviving sepsis' guidelines (2012), along with a thorough update of all the latest information and technology in the field of paediatric critical care. 378 illustrations include updated flowcharts for several chapters, giving a quick overview of management of common PICU problems. Practical Approach to Pediatric Intensive Care serves as a complete guide to the day-to-day management of the PICU. Key Points Sections on specific systems of the human body New resuscitation and international 'surviving sepsis' guidelines included 378 illustrations over 1000+ pages New, fully revised edition Previous edition published 2008

Book description This title is directed primarily towards health care professionals outside of the United States. Covering the full age and specialty spectrum this text brings

together for the first time, individual chapters from among the most respected children's nurses. This textbook is rooted in child-centred health care within a family context and draws upon best contemporary practice throughout the UK and further afield. This innovative text harnesses new design parameters in enquiry-based/problem-based learning, providing up-to-date information on a wide range of topics. In an exciting addition each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Each chapter offers readers additional material on an Evolve website. Full Microsoft PowerPoint presentations augment the written chapters and provide extra information that includes case studies, moving image, photographs and text. Aims, objectives, learning outcomes, a summary box in each chapter and key points assist learning and understanding Professional conversation boxes enliven the text on the page and make it more interesting to dip into Suggestions for seminar discussion topics to help teachers Case studies help to relate theory to practice Prompts to promote reflective practice Activity boxes/suggested visits Evidence based practice boxes which highlight key research studies, annotated bibliographies including details of web-sites and full contemporary references to the evidence base Resource lists including recommended web-site addresses

Paediatric Intensive Care Feb 22 2023 Paediatric Intensive Care gives practical and realistic advice for all those who care for critically ill children. Organised predominantly by system or speciality for easy reference, it also comprehensively covers the underlying principles that guide clinicians in every day practice.

Liver Diseases in the Pediatric Intensive Care Unit Jun 02 2021 In recent years, substantial progress has been made in the approaches to diagnosis and treatment of severe liver diseases in the pediatric ICU, from various forms of liver failure and hepatitis to acute and chronic liver disease. New techniques and tools are being utilized to prevent patients from experiencing complications and for patients in recovery from operations on the native or donor liver. This book describes the clinical presentation and management of liver diseases in the intensive care unit with the pediatric patient in mind. In addition, advances in bone marrow transplantation, cardiac-generated liver disorders and new therapeutic approaches, such as artificial liver support, are discussed in detail. Presenting the current available knowledge in a compelling form, Liver Diseases in the Pediatric Intensive Care Unit is a valuable resource for pediatric gastroenterologists and hepatologists, pediatricians and intensivists.

Oxford Specialist Handbook: Myeloproliferative Neoplasms Oct 26 2020 Our understanding of myeloproliferative neoplasms (MPN) disorders, a group of clonal haematological malignancies characterized by excessive accumulation of one or more myeloid cell lineages, has grown considerably over the past four decades. Myeloproliferative Neoplasms offers a detailed evidence-based guide to MPNs in an easily accessible format, structured to facilitate learning specialist information by presenting core information in 'bite size' chunks. Each chapter summarises the state-of-the art preclinical and clinical knowledge, and its impact on the clinical management of patients with MPNs. This practical guide, written by experts in the field, is essential reading for oncologists, haematologists, and other health care professionals interested in the field of MPNs.

Oxford Specialist Handbook of Retrieval Medicine Mar 31 2021 The Oxford Specialist Handbook of Retrieval Medicine is a core, concise and practical text covering the complex clinical and logistical problems experienced in the retrieval environment. Focusing on evidence-based management and clear clinical guidance, this easily portable handbook provides a comprehensive and accessible guide to this growing field for all health professionals involved in the retrieval and transfer of critically ill patients. Covering the practice of acute, emergency and critical care medicine in the transport environment, this handbook provides the practical guidance and clinical knowledge to enable medical practitioners to function independently in highly variable and resource limited environments with acutely unwell, unstable and often clinically undifferentiated patients over long durations. Closely mapped to the Royal College of Surgeons syllabus on retrieval and transfer medicine, this title comprehensively

covers all aspects of retrieval medicine, from basic flight physiology to more complex retrievals and common pitfalls. Authored by an authoritative, international team of expert editors and specialist authors, this clinically focused text is complemented by a range of checklists and reference tools for practical and accessible use in the field. These deliver core information for use in the primary retrieval setting, allowing the retriever to structure their approach to a crisis and correct the problem with suggested interventions. Topics include retrieval systems and coordination, crisis resource management, shock, and a range of chapters focusing on responding to specific areas of medicine when encountered in the retrieval environment, such as cardiology and obstetrics and gynaecology.

Essential Revision Notes in Paediatrics for the MRCPCH Jun 21 2020 The definitive guide to revision for the MRCPCH examination. 25 Chapters covering all areas the MRCPCH syllabus in note format. Concise presentation of information, with hints and tips. Vital facts presented in an attractive user-friendly format. Diagrams, pie charts, lists, illustrations and bullet points to aid learning.

Paediatric Intensive Care Nov 07 2021 One in 70 children are admitted to paediatric intensive care (PIC) at some time during childhood. Most paediatric junior doctors will rotate through PIC, and will be involved in organising acute intensive care for critically ill children. The range of children and their illnesses going through PIC is vast, making it a hugely diverse specialty. A critically ill child will end up there regardless of their underlying disease, and as a result consultants in PIC must be true generalists and need to acquire knowledge and skills in all areas of paediatrics, as well as acquiring significant knowledge of anaesthesia and surgery. From setting up the ventilator, to managing low cardiac output, Paediatric Intensive Care gives practical and realistic advice for children's doctors and nurses in intensive care. Information is presented in easily-accessible '5 minute chunks' to enable you to quickly get the answers you need, with extensive cross-referencing ensuring that different aspects of a particular clinical problem are fully covered. With detailed answers to specific problems and expert guidance on how to manage the complex issues faced in PIC, this handbook is an indispensable guide for all those who provide care to sick children.

Challenging Concepts in Paediatric Critical Care Nov 26 2020 This practical title presents 18 challenging cases in paediatric critical care, complete with case histories and evidence-based, up-to-date learning points and clinical tips. Each chapter has commentary from an expert who identifies and explains the key points and controversies of the case.

The Harriet Lane Handbook E-Book Jan 29 2021 Trusted by generations of residents and practitioners, The Harriet Lane Handbook remains your first choice for fast, accurate information on pediatric diagnosis and treatment. The first medical reference book written "by residents, for residents" and reviewed by expert faculty at The Johns Hopkins Hospital, it continues to provide the gold standard in point-of-care clinical information for any health care professional treating pediatric patients. Consult this title on your favorite e-reader, conduct rapid searches, and adjust font sizes for optimal readability. Take advantage of the most dependable drug information available with thoroughly updated, one-of-a-kind Pediatric Formulary providing the standard of pediatric care from the leading pediatric hospital in the world. Trust thoroughly updated content that includes parameters for pediatric and neonatal septic shock; guidelines for acute management of severe traumatic brain injury; a convenient table detailing common genetic tests; a significantly extended collection of radiologic images; expanded mental health coverage; plus much more. Access information easily and quickly with reformatted sections designed to make the book easier to use via mobile device.

Paediatric Manual Mar 19 2020 The Paediatric Manual is a handy reference for doctors and nurses in the management of paediatric patients. This enlarged 5th Edition contains information on many practical aspects, including diagnostic tests, charts, graphs, management schemes and drug dosages.

Critical Care of the Pediatric Immunocompromised Hematology/Oncology Patient Oct 14 2019 This volume provides a comprehensive overview of

critical care of the pediatric immunocompromised hematology-oncology patient. The text focuses on unique aspects of the pediatric immunocompromised patient that predisposes the child to significant illness, and presents critical care management strategies specific to the patient population. In addition to chapters on oncology, primary immune deficiency, immunocompromised hematology, and hematopoietic cell transplant patients, the book covers the changing landscape of ICU care, pharmacologic considerations, and psychological and social aspects of the critical care of hematology-oncology patients. Written by experts from a range of disciplines, *Critical Care of the Pediatric Immunocompromised Hematology/Oncology Patient: An Evidence-Based Guide* is a valuable resource for clinicians and practitioners who treat this patient population.

The PICU Handbook Feb 10 2022 An innovative new survival guide for the pediatric intensive care unit (PICU) The PICU Handbook is a unique, pocket-sized compilation of the data necessary for residents and fellows to navigate the modern Level 1 and Level 2 pediatric intensive care unit. Enhanced by numerous tables, formulas, algorithms, guidelines, checklists, rapid-sequence medication formularies, troubleshooting guides, and clinical pearls, this is a true must read for all junior clinicians and pediatric critical care nurses. Readers will find wide-ranging coverage of every critical issue they will encounter in the PICU, including airway clearance, respiratory mechanics and respiratory failure, endotracheal intubation, shock, brain death evaluation, and much more. The PICU Handbook is edited by the Associate Medical Director of Children's Memorial Hospital/Ann & Robert H. Lurie Children's Hospital of Chicago, and features contributions from current and former pediatric residents and pediatric critical care fellows.

Paediatric Intensive Care Guidelines. Royal Children's Hospital Nov 14 2019 These guidelines have been produced for use The Royal Children's Hospital Intensive Care Unit, however they could be useful in other intensive care units. The advice in this booklet is intended as a guide only.

Essentials of Paediatric Intensive Care Sep 17 2022 This is an essential handbook for all those involved in the care of critically ill children. It covers all of the key aspects of paediatric intensive care and also features a comprehensive 'list' of drugs commonly used in paediatric anaesthesia and intensive care, including those used for premedication, anaesthesia, local anaesthesia, analgesia, cardiac anaesthesia, antibiotics, emergency and resuscitation drugs, inotropes, 'new' drugs (e.g. calcium infusions, epoprostenal).

The Beginner's Guide to Intensive Care May 13 2022 '...provides an excellent introduction to the management of acute illness for all clinical staff, and a solid foundation for those who choose to make ICM a fulfilling life-long career.' From the Foreword by Julian Bion, Professor of Intensive Care Medicine, University of Birmingham Ideal for any medic or health professional embarking upon an intensive care rotation or specialism, this simple bedside handbook provides handy, pragmatic guidance to the day-to-day fundamentals of working in an intensive care unit, often a daunting prospect for the junior doctor, nurse and allied health professional encountering this challenging environment for the first time. Thoroughly updated, the second edition addresses recent and future developments in a variety of areas and is now organised into easy-to-read sections with clearly outlined learning goals. New topics added include sepsis, ARDS, refractory hypoxia, the role of allied health professionals, post ICU syndrome and follow up, and consent and capacity including new DOLS guidance. The book is authored by world-renowned contributors and edited by established consultants in the field of intensive care medicine.

Essentials of Paediatric Intensive Care Jan 09 2022

Handbook of Paediatric Intensive Care Jun 14 2022 This is a highly practical guide to the care of very sick children, giving clear and concise advice on diagnosis and management.

The Handbook of Child Life Apr 19 2020 Child life is a profession that draws on the insights of history, sociology, anthropology and psychology to

serve children and families in many critical stress points in their lives, but especially when they are ill, injured or disabled and encounter the hosts of caregivers and institutions that collaborate to make them well. Children and their families can become overwhelmed by the task of understanding and navigating the healthcare environment and continue to face challenges through their daily encounters. It is the job of child life professionals to provide care and guidance in these negotiations to serve as culture brokers, interpreters of the healthcare apparatus to family and child and the child to medical professionals. Despite the best efforts to provide quality, sensitive psychosocial care to children and their families, they remain vulnerable to lingering aftereffects. The goal of this revised edition is to help prepare child life specialists to deliver the highest level of care to children and families in the context of these changing realities. Each chapter has been substantially revised and two new chapters have been added. This book will be a valuable resource for not only child life specialists but also nurses, occupational and recreational therapists, social workers and other hospital personnel.

Rogers' Handbook of Pediatric Intensive Care Oct 18 2022 This handbook is a synopsis of the clinical chapters from Rogers' Textbook of Pediatric Intensive Care, Fourth Edition. Readers will find the core information they need for quick reference and safe practice in the pediatric ICU. The book includes a large number of tables and line drawings.

ERS Handbook of Paediatric Respiratory Medicine Oct 06 2021 The 19 sections of this second edition of the ERS Handbook of Paediatric Respiratory Medicine cover the whole spectrum of paediatric respiratory medicine, from anatomy and development to disease, rehabilitation and treatment. The editors have brought together leading clinicians to produce a thorough and easy-to-read reference tool. The Handbook is structured to accompany the paediatric HERMES syllabus, making it an essential resource for anyone interested in this field and an ideal educational training guide.

Merenstein & Gardner's Handbook of Neonatal Intensive Care - E-Book Jul 03 2021 Merenstein & Gardner's Handbook of Neonatal Intensive Care, 8th Edition, is the leading resource for collaborative, interprofessional critical care of newborns. Co-authored by physicians and nurses, it offers concise, comprehensive coverage with a unique multidisciplinary approach and real-world perspective that make it an essential guide for both neonatal nurses and physicians. The 8th edition features the latest neonatal research, evidence, clinical guidelines, and practice recommendations — all in a practical quick-reference format for easy retrieval and review of key information. UNIQUE! Multidisciplinary author and contributor team consists of two physicians and two nurses, with each chapter written and reviewed by a physician-nurse team to ensure that information mirrors current, real-world practice in a neonatal intensive care unit. Critical Findings boxes and tables outline symptoms and diagnostic findings that require immediate attention, helping you prioritize assessment data and steps in initial care. UNIQUE! Clinical content highlighted in color allows you to quickly scan for information that directly affects patient care. UNIQUE! Parent Teaching boxes highlight relevant information to share with a patient's caregivers. Clinical images, graphs, and algorithms illustrate clinically relevant concepts in neonatal intensive care. Streamlined references include only the most current or classic sources. NEW! Coverage of the latest neonatal research, evidence, clinical guidelines, and practice recommendations addresses topics such as: women with chronic illnesses becoming pregnant; maternal obesity; hypotension and shock in premature infants; pain and sedation; dedicated feeding sets vs. IVs for safety; MRSA; pediatric stroke; autism screening; discharge coordination; and more. NEW! The latest AAP recommendations and guidelines for hypoglycemia, jaundice, herpes, respiratory syncytial virus, and neonatal transport team composition. EXPANDED! Revised Evidence-Based Clinical Practice chapter focuses on evidence-based practice and quality improvement and the role of qualitative research in EBP. EXPANDED! Updated Infection in the Neonate chapter features new GBS guidelines and CRP research.

Oxford Specialist Handbook of Paediatric Gastroenterology, Hepatology, and Nutrition Sep 05 2021 The Oxford Handbook of Paediatric

Gastroenterology, Hepatology, and Nutrition has been fully updated, with new chapters on transplantation, nutritional management, and liver function and biopsy to increase the breadth and depth of coverage of this range of closely related disciplines. Written by a team of experts at the top of their field, this handbook is a practical reference manual containing information on the day-to-day management of both rare and common conditions that are encountered by those who regularly see children with gastroenterology, hepatology, and nutritional problems. Containing up-to-date information and clearly organised for ease of reference, management guidelines and references to key articles for further reading are included to make this handbook an invaluable resource for both established and trainee clinicians, as well as other members of multidisciplinary teams such as specialist nurses, dieticians, and pharmacists.

Paediatric Intensive Care Nursing Jan 21 2023 The needs of critically ill children are unique and highly specialized. Paediatric Intensive Care Nursing is an essential manual of care and an invaluable resource to all those involved in the care of critically ill children and young people. Covering all the key aspects of pediatric intensive care, it is a fully comprehensive textbook which provides an evidence-based and up-to-date guide for all nurses who work with critically ill children. Paediatric Intensive Care Nursing is divided into four user-friendly sections: The first section looks at the general background of paediatric intensive care Section two employs a systems approach, with each chapter focusing on a specific disease and following the same framework. This includes treating children with cardiac conditions, acute neurological dysfunction, musculoskeletal injuries and gastrointestinal and endocrine conditions Section three looks at the essential care of managing pain relief, transportation needs and treating wounds The final section explores the holistic aspects of nursing - nutrition and fluid management, infection control issues, safeguarding children and spirituality and bereavement Written by a team of experts in the field, Paediatric Intensive Care Nursing is indispensable reading for nurses and health care professionals working with critically ill children.

Oxford Specialist Handbook of Hand Surgery Feb 27 2021 Fully revised and updated, the second edition of the Oxford Specialist Handbook of Hand Surgery has been broadened to reflect the diverse nature of the speciality, providing more detail on hand therapy and alternatives to hand surgery, whilst maintaining surgical techniques in line with current guidelines. The compact format is designed to work both as a revision guide, with clearly organised chapters and headings throughout, and as an aide-memoire for fine detail such as pathology classifications. Featuring an authoritative list of contributors from hand surgeons and therapists, this new edition reflects the close working relationships between the two disciplines and draws from the knowledge of experts in the field.

Children in Intensive Care E-Book Aug 04 2021 Children in Intensive Care fulfils a unique role in supporting clinical staff during the day-to-day management of the sick child. Presented in quick reference format, and in plain English, the book offers a unique guide to the wide variety of situations that a practitioner is likely to encounter during daily practice. Rich with reference tables, algorithms, artworks and 'Alert' boxes, the book offers a wealth of information which ranges from physiology to drug dosage calculation, drug compatibility lists, reference ranges, and X-ray interpretation. New chapters include oncologic emergencies, pain management and sedation, together with the latest information on the management of sepsis, the collapsed child, and care of the child following spinal surgery. Information presented in quick reference format, with accompanying reference tables, to facilitate on-the-spot usage Advanced Life Support Group algorithms provide safe and easy-to-follow protocols to the management of emergency situations Contains input from a broad range of paediatric specialists - intensivists, anaesthetists, haematologists, oncologists, air ambulance physicians and retrieval nurses, pharmacists, specialist dieticians, and respiratory physiotherapists - to ensure full coverage and accuracy of information Contains helpful 'Quick Guide' and 'Warning' boxes to provide key information at a glance, while helpful mnemonics assist with learning Contains chapters on normal child development, safe-guarding children and young people, and patient transport

Perfect for use on the wards, theatres, high-dependency units and intensive care units as well as during retrieval and A&E Ideal for newcomers and experienced staff alike, whether they be junior doctors or nursing staff Additional authorship brings the expertise of Marilyn McDougall, a Senior Paediatric Intensive Care Consultant Contains brand new chapters - oncology emergencies and pain & sedation - as well as the latest information on topics including sepsis and the collapsed neonate, and care of children after spinal surgery Comprehensively expanded cardiac chapter presents new surgical approaches as well as practical tips on pacing, care of chest drains and basic echocardiograph terminology Drug chapter now includes reversal agents, new drug profiles and an updated compatibilities chart Expanded artwork program explains clinical concepts and practical procedures

Rogers' Textbook of Pediatric Intensive Care Aug 16 2022 Pt. One: Critical care integration -- Sect. I: Introduction to the practice of pediatric critical care -- Sect. VIII: Renal, endocrine, and metabolic disorders - - Sect. IX: Oncologic and hematologic disorders.

Haematology in Critical Care Mar 11 2022 Issues of thrombosis, bleeding, and transfusion are extremely common, and often complex, in critically ill patients. *Haematology in Critical Care: A Practical Handbook* provides a dependable source of expert guidance on how to handle common haematological problems seen in the critical care setting, as well as the acute care of patients with a primary haematological disorder. Full-time clinical haematologists, regularly attending on intensive care, the Editors begin with an approach to abnormal laboratory tests, following with a disease-orientated approach to topics such as coagulation and haematological malignancy. Other key topics include paediatric and neonatal care, transfusion, point of care testing and the emergency presentation of haematological disease. This title brings together two of the most highly scientific specialties in clinical practice, delivering a practical approach to these problems, and guiding the clinician through the diagnosis and management of common scenarios encountered in the ICU.

Pediatric Critical Care Nov 19 2022 This extensively updated textbook is a comprehensive study guide that covers pediatric critical care principles and specific disease entities commonly encountered by the pediatric critical care medicine (PCCM) practitioner. Pathophysiologic aspects unique to the pediatric patient are emphasized. The first edition has become a highly utilized text for pediatric critical care fellows. The second edition will prove even more valuable to the fellow in-training and indeed to any clinical pediatric intensivist. In addition to updating the chapters from the previous edition, there are new chapters on topics such as central nervous structure and function, palliative care, child abuse and practical biostatistics. *Pediatric Critical Care: Text and Study Guide* is an invaluable clinically focused resource for PCCM practitioners. Allowing for concise reading on specific topics, this book acts as both text and study guide covering advanced physiology, pathophysiology, diagnostic considerations and treatment approaches that should be mastered by the higher level PCCM practitioner. The large number of illustrations complements the text in each chapter that also includes key references and case-orientated questions that help reinforce important ideas learned in the chapter.

Nursing the Highly Dependent Child or Infant May 21 2020 *Nursing the Highly Dependent Infant or Child* is an accessible and clinical guide to the caring for the acutely ill child. It provides guidance on the specific nursing skills required to care for children and infants who require a 'step up' level of care from those on the general paediatric ward or a 'step down' level of care on discharge from neonatal or paediatric critical care facilities.

The book follows a general systems approach, covering themes such as respiratory care, renal care and cardiac care as well as covering specialities such as neuro-trauma, burns and transportation of the acutely ill infant or child. Other areas explored include pain and sedation, monitoring and meeting the nutritional needs of the highly dependent child. Each chapter provides an overview of relevant anatomy and physiology, guidance on assessment and monitoring, and outlines effective nursing care and management guidance of common conditions encountered in acute children's care.
