*100 Ideas for Primary Teachers: Questioning* Nov 19 2022 Questioning is key to effective teaching and learning, yet practical questioning strategies that are immediately useable in the classroom can be hard to come by. *100 Ideas for Primary Teachers: Questioning* presents practical strategies, games and activities not only to help teachers improve their own questioning in the classroom, but also to allow pupils to develop an understanding of how they too can ask effective questions to develop their learning. Using philosophical approaches including ownership, authenticity, balance and Socratic principles, Peter Worley, co-founder of The Philosophy Foundation, provides guidance and ideas on how questioning can help pupils reach the next step and activate their own thinking. He also encourages teachers to reflect on their practice and the effect of questioning on children's progress. The ideas in this book are applicable to all subjects in a primary teacher's curriculum and are ideal for establishing good questioning strategies and a solid understanding of this core element of teaching.

**European Higher Education Area: The Impact of Past and Future Policies** Jul 03 2021 This volume presents the major outcomes of the third edition of the *Future of Higher Education - Bologna Process Researchers Conference (FOHE-BPRC 3)* which was held on 27-29 November 2017. It acknowledges the importance of a continued dialogue between researchers and decision-makers and benefits from the experience already acquired, this way enabling the higher education community to bring its input into the 2018-2020 European Higher Education Area (EHEA) priorities. The *Future of Higher Education - Bologna Process Researchers Conference (FOHE-BPRC)* has already established itself as a landmark in the European higher education environment. The two previous editions (17-19 October 2011, 24-26 November 2014), with approximately 200 European and international participants each, covering more than 50 countries each, were organized prior to the Ministerial Conferences, thus encouraging a consistent dialogue between researchers and policy makers. The main conclusions of the FOHE Conferences were presented at the EHEA Ministerial Conferences (2012 and 2015), in order to make the voice of researchers better heard by European policy and decision makers. This volume is dedicated to continuing the collection of evidence and research-based policymaking and further narrowing the gap between policy and research within the EHEA and broader global contexts. It aims to identify the research areas that require more attention prior to the anniversary 2020 EHEA Ministerial Conference, with an emphasis on the new issues on rise in the academic and educational community. This book gives a platform for discussion on key issues between researchers, various direct higher education actors, decision-makers, and the wider public. [Exemplary Teachers of Students in Poverty](#) Oct 26 2020 Education and poverty exist in a highly contested relationship even in the developed world. On the one hand, educational outcomes seem solidly attached to socio-economic status, and on the other, education is often cited as a way out of poverty. Success at decoupling poverty from educational outcomes varies across the developed world. The issues connecting education and poverty are complex, but the question of the successful engagement of students from poor backgrounds involves a complex mix of public policy on poverty, public policy on education, and teacher action. This book focuses on a number of exemplary teachers who demonstrate a set of common pedagogical qualities, assisting them to work productively with persistent classroom challenges in low SES classrooms. *Exemplary Teachers of Students in Poverty* shares successful classroom practice from schools serving diverse and disadvantaged communities, and stresses that opportunities in school can influence educational engagement and encourage students to achieve. The text locates itself in international debates

about education and poverty, and reports on the Teachers for a Fair Go project - an Australian research project into the work of a number of teachers who were successful at engaging students from poor backgrounds. Included in the book: teaching in low SES communities what exemplary teachers of students in low SES communities do specific pedagogical approaches in literacy, ICT, creativity and culturally responsive practices students' voices professional qualities of these teachers Exemplary Teachers of Students in Poverty will greatly benefit researchers, teacher educators and trainee teachers, allowing them to gain a much deeper understanding of the issues, constraints and perspectives in teaching contexts across low SES communities.

**Integrating Transparency in Learning and Teaching (TILT): An Effective Tool for Providing Equitable Opportunity in Higher Education** Dec 20 2022 Students of color and those of lower economic backgrounds and of underrepresented groups appear to face a disadvantage when they transition from high schools into colleges. These students tend to have lower academic preparation than white students, which leads to higher levels of stress and anxiety, as well as an increased placement in remedial courses, which negatively impacts their graduation rates. As institutions become aware of these facts and take appropriate measures to improve educational experiences, they must implement Transparency in Learning and Teaching (TILT) initiatives in order to provide equal access to education. Integrating Transparency in Learning and Teaching (TILT): An Effective Tool for Providing Equitable Opportunity in Higher Education provides information on Transparency in Learning and Teaching (TILT) concepts and how they can be used in course development to improve student learning and performance. It focuses on bringing positive learning experiences to college students, especially first-generation students, which can lead to higher levels of academic success. It strongly advocates for transparent education and provides guidance for overcoming the existing accessibility gap in higher education. Covering topics such as business education, online learning platforms, and teaching modalities, this book is an indispensable resource for academicians, faculty developers, administrators, instructional designers, professors, and researchers.

**Sociocultural Research on Mathematics Education** Jan 29 2021 This volume--the first to bring together research on sociocultural aspects of mathematics education--presents contemporary and international perspectives on social justice and equity issues that impact mathematics education. In particular, it highlights the importance of three interacting and powerful factors--gender, social, and cultural dimensions. Sociocultural Research on Mathematics Education: An International Perspective is

distinguished in several ways: \* It is research based. Chapters report on significant research projects; present a comprehensive and critical summary of the research findings; and offer a critical discussion of research methods and theoretical perspectives undertaken in the area. \* It is future oriented, presenting recommendations for practice and policy and identifying areas for further research. \* It deals with all aspects of formal and informal mathematics education and applications and all levels of formal schooling. As the context of mathematics education rapidly changes-- with an increased demand for mathematically literate citizenship; an increased awareness of issues of equity, inclusivity, and accountability; and increased efforts for globalization of curriculum development and research-- questions are being raised more than ever before about the problems of teaching and learning mathematics from a non-cognitive science perspective. This book contributes significantly to addressing such issues and answering such questions. It is especially relevant for researchers, graduate students, and policymakers in the field of mathematics education.

**How Not To Teach Yoga: Lessons on Boundaries, Accountability, and Vulnerability Learnt the Hard Way** Mar 11 2022 Tori has done a lot of f\*cked up things in the pursuit of being a "good" yoga teacher. She didn't mean to be f\*cked up; f\*cked up things just happened while she was busy attempting to be a personable sage and humble expert on philosophy, mediation, anatomy, functional movement, energy healing, and everything else a yoga teacher is supposed to be good at. It never occurred to her that how she was going about teaching all this expertise might be, well, f\*cked up, or potentially even harmful to herself and others. It's a common misstep for yoga teachers: we get so focused on learning everything there is to know about yoga that we overlook the importance of learning how to skillfully teach these things to people. Despite our best of intentions and, usually without realizing it, we fall into common traps like manipulation, elitism, imposter syndrome, and bewilderment when it comes to applying any sort of personal and professional boundaries to what we do. This is a book about how we all mess up and how we can all do better. No Shame. No right or wrong answers. No arbitrary life advice. Through a mix of personal stories, guided reflections, and best practices taken from her experience as a social worker, Tori offers up an easy-to-follow guide for any teacher wanting to show up more reliably for themselves and those whom they teach.

**Global Corruption Report: Education** Oct 06 2021 Corruption and poor governance are acknowledged as major impediments to realizing the right to education and to reaching the Millennium Development Goal of universal primary education by 2015. Corruption not only distorts access to education, but affects the quality of education and the reliability of research findings. From corruption in the procurement of school resources and nepotism in the hiring of teachers, to the buying and selling of academic titles and the skewing of research results, major corruption risks can be identified at every level of the education and research systems. Conversely, education serves as a means to strengthen personal integrity and is a critical tool to address corruption effectively. The Global Corruption Report (GCR) is Transparency International's flagship publication, bringing the expertise of the anti-corruption movement to bear on a specific corruption issue or sector. The Global Corruption Report on education consists of more than 70 articles commissioned from experts in the fields of corruption and education, from universities, think-tanks, business, civil society and international organisations. The Global Corruption Report on education and academic research will provide essential analysis for understanding the corruption risks in the sector and highlight the significant work that has already been done in the field to improve governance and educational outcomes. This will be an opportunity to pull together cutting edge knowledge on lessons learnt, innovative tools and solutions that exist in order to fight corruption in the education sector.
