Modern product development means problem solving by teams in complex working environments. Thereby, the design process is influenced by factors from various fields, the task, the individual, the team, and the organisational context. This complex network of influences turns product development into a challenge with requirements for the designers aside from technical problems. This book contains the proceedings of the international symposium Designers - The Key to Successful Product Development held in Darmstadt, Germany, December 1997. During this meeting exponents from different leading research groups in engineering design came together to present and discuss their results. Within this volume different aims, issues and methods of design research are addressed in 23 contributions by different research groups. Structured in six sections according to the main fields of influence, it provides a survey of the state of scientifically-based knowledge and the trends of engineering design research on the influences leading to successful product development. Digitalisierungsprojekts Springer Book Archives mit Publikationen, die seit den Anfängen des Verlags von 1842 erschienen sind. Der Verlag stellt mit diesem Archiv Quellen für die historische wie auch die disziplingeschichtliche Forschung zur Verfügung, die jeweils im historischen Kontext betrachtet werden müssen. Dieser Titel erschien in der Zeit vor 1945 und wird daher in seiner zeittypischen politisch-ideologischen Ausrichtung vom Verlag nicht beworben. The World Guide to Special Libraries lists about 35,000 libraries world wide categorized by more than 800 key words - including libraries of departments, institutes, hospitals, schools, companies, administrative bodies, foundations, associations and religious communities. It provides complete details of the libraries and their holdings, and alphabetical indexes of subjects and institutions. These conference proceedings include the specialized academic lecture and brief contributions presented at the Humans and Computers 2015 conference in Stuttgart. It provides multiple perspectives from research that collectively provide a kaleidoscope of ideas, theories, and methodologies. The conference bridges the gap between theory and practical implementation with numerous application-oriented essays. Originally published in 1985, this book was an attempt at a comprehensive review of the psychology of action in various areas of psychology. It is also an attempt to bridge two languages and traditions in psychology: German and Anglo-American.

Although Anglo-American psychology had had an enormous influence on German psychology, the influence had not gone the other way around – at least not in recent years. Therefore, this book attempts to get the two traditions to speak with each other. The main article, from one language area, and the following discussion, from the other language area, together result in an extensive treatment of an action-theoretic approach in the respective psychological area; thus, both the main article and "discussion" should be read together. Der Band versammelt schlaglichtartig aktuelle Forschungs- und Lehrprojekte, die technische Innovationen in Journalismus, Corporate Media und strategischer Kommunikation aufgreifen. Die Beiträge liefern Erkenntnisse zu veränderten Anforderungen an den journalistischen Arbeitsalltag und die Ausbildung, stellen innovative Darstellungsformen und Formate vor, beleuchten Trends im Lokalfernsehen, Social- und Mobile-TV sowie Herausforderungen durch Content Marketing, Innovationskommunikation und interne Unternehmenskommunikation. Darüber hinaus werden methodische Ansätze für neue Szenarien der Mediennutzung, etwa mobile Rezeptionssituationen, aufgezeigt. Complex and controversial, hackers possess a wily, fascinating talent, the machinations of which are shrouded in secrecy. Providing in-depth exploration into this largely uncharted territory, Profiling Hackers: The Science of Criminal Profiling as Applied to the World of Hacking offers insight

into the hacking realm by telling attention-grabbing ta Il terreno dell'hacking è impervio e somiglia a una zona di guerra, in cui non ci si può fidare di niente e di nessuno. Seguendo le chiare spiegazioni passo passo e le esercitazioni pratiche presenti in questo libro, il lettore vivrà una sorta di addestramento, durante il quale imparerà a sfruttare gli strumenti disponibili in Rete ma all'occorrenza saprà anche crearne anche di nuovi, contando solo su Python e la sua libreria standard. Dopo la preparazione dell'ambiente di sviluppo e un'introduzione al funzionamento delle reti, si passa alla spiegazione dello sniffing di pacchetti e a tutto ciò che concerne l'intercettazione delle comunicazioni a ogni livello. Sono quindi descritti alcuni framework fondamentali che possono essere integrati nel flusso di lavoro di un hacker Python: Scapy, Burp, ma anche GitHub, uno dei servizi più noti al mondo per la condivisione del codice. Nei capitoli finali, che illustrano le tecniche più avanzate, il libro mostra come realizzare un framework per trojan, approfondisce l'essfiltrazione dei dati e svela come scalare i privilegi in Windows, fino a spingersi nell'ambito dell'informatica forense. This book presents the work of the RILEM Technical Committee 276-DFC: Digital fabrication with cement-based materials. The most important outcomes of the technical committee are presented. First, a unified process classification for digital fabrication with concrete is proposed, discussed and illustrated. Then, a state of the art of the testing methods

(both at a material and structural level and in the fresh and hardened state) is provided. The gathered knowledge is expected to form the foundation of some quality control procedures for fresh properties along with hardened properties and service life performance. The book will benefit academics, practitioners, industry and standardization committees interested in digital fabrication with cement-based materials. ‘Ziekenhuis lekt patiëntengegevens’, ‘OV-chipkaart zo lek als een mandje’, ‘Bankieren App onbetrouwbaar’ – het lijkt wel of tegenwoordig alles te hacken is. Gelukkig is de persoon die dat doet niet altijd een cybercrimineel, maar juist iemand die wil helpen de digitale beveiliging te verbeteren. Wie zijn deze ethisch hackers? Hoe ver mogen ze gaan? En wat moeten we doen als zij een beveiligingslek onthullen? In dit boek komen hackers, gehackten, ICT-ers, journalisten, managers, politici en juristen aan het woord die betrokken zijn geweest bij een ethische hack. Ze schetsen een digitaal polderlandschap waarin iedereen een beetje, maar uiteindelijk niemand volledig verantwoordelijk is voor de informatiebeveiliging. De persoonlijke verhalen geven een kijkje in de mysterieuze wereld van cyber security en laten zien hoe hackers ons kunnen helpen. www.helpendehackers.nl Networking means to create nets of relations, where the publisher and the reader, the artist and the audience, act on the same level. The book is a first tentative reconstruction of the history of artistic networking in Italy, through an analysis of media and art projects which during the past twenty years have given way to a creative, shared and aware use of technologies, from video to computers, contributing to the creation of Italian hacker communities. The Italian network proposes a form of critical information, disseminated through independent and collective projects where the idea of freedom of expression is a central theme. In Italy, thanks to the alternative use of Internet, during the past twenty years a vast national network of people who share political, cultural and artistic views has been formed. The book describes the evolution of the Italian hacktivism and net culture from the 1980s till today. It builds a reflection on the new role of the artist and author who becomes a networker, operating in collective nets, reconnecting to Neoavant-garde practices of the 1960s (first and foremost Fluxus), but also Mail Art, Neoism and Luther Blissett. A path which began in BBSes, alternative web platforms spread in Italy through the

1980s even before the Internet even existed, and then moved on to Hackmeetings, to Teletreet and networking art by different artists such as 0100101110101101.ORG, [epidemiC], Jaromil, Giacomo Verde, Giovanotti Mondani Meccanici, Correnti Magnetiche, Candida TV, Tommaso Tozzi, Federico Bucalossi, Massimo Contrasto, Mariano Equizzi, Pigreca, Molleindustria, Guerriglia Marketing, Sexyshock, Phag Off and many others. Bacterial pathogens whose development is restricted to the interior of eukaryotic cells encounter a unique set of hurdles to be overcome to enable growth. This issue is dedicated to the examination of the unique infection biology associated with this obligate intracellular existence. Distinct approaches to obligate intracellular parasitism will be covered by considering a range of molecular, cellular, and immunological mechanisms governing the overall success of pathogens including Chlamydia, Coxiella, Rickettsia, and Ehrlichia. The overall goal is to provide insight into both microbial and host mechanisms that enable colonization of a specialized intracellular niche. The sbe22 berlin D-A-CH conference as part of the SBE conference series campaign 2021–2023 will be hosted by the Natural Building Lab of TU Berlin in cooperation with KIT Karlsruhe, ETH Zürich and TU Graz. Based on the 17 UN Sustainable Development Goals, participants at the hybrid conference in autumn 2022 will discuss the challenges and opportunities presented by current transformation projects and processes at local and regional levels. As part of the SBE network, researchers will have the chance to make links between local approaches and wider regional, continental and global trends. The conference will provide a design-oriented, architectural and urban planning entry point to a broad inter- and transdisciplinary debate on the following themes: resource management and material flows, climate neutral buildings, post-fossil infrastructures, critical digitalisation and socio-political frames for transitions. These themes represent key solution fields to address sustainability challenges within the planning, construction and real estate sector. Die sbe22 berlin D-A-CH Konferenz im Rahmen der SBE Konferenzreihe Kampagne 2021–2023 wird vom Natural Building Lab der TU Berlin in Kooperation mit dem KIT

Karlsruhe, der ETH Zürich und der TU Graz ausgerichtet. Ausgehend von den 17 UN-Zielen für nachhaltige Entwicklung werden die Teilnehmer der Hybridkonferenz im Herbst 2022 die Herausforderungen und Chancen aktueller Transformationsprojekte und -prozesse auf lokaler und regionaler Ebene diskutieren. Als Teil des SBE-Netzwerks werden ForscherInnen die Möglichkeit haben, Verbindungen zwischen lokalen Ansätzen und breiteren regionalen, kontinentalen und globalen Trends herzustellen. Die Konferenz bietet einen entwurfsorientierten, architektonischen und städtebaulichen Einstieg in eine breite inter- und transdisziplinäre Debatte zu folgenden Themen: Ressourcenmanagement und Materialflüsse, klimaneutrale Gebäude, postfossile Infrastrukturen, kritische Digitalisierung und gesellschaftspolitische Rahmenbedingungen für Übergänge. Diese Themen stellen zentrale Lösungsfelder für die Bewältigung der Nachhaltigkeitsherausforderungen im Planungs-, Bau- und Immobiliensektor dar.

nicht zum Zug! Work Across the Lifespan coalesces lifespan theoretical and lifespan-based empirical perspectives on aging and work. The book examines human development theories that explain patterns of growth, trajectories of change and maintenance of continuities across the entirety of life. Using the implicit focus of these theories on aging as a guide to intra-individual change and goal-based self-regulation processes, the book examines the relationship between work and aging. Drawing upon developmental psychology, life course sociology, microeconomics, and critical gerontology, this authoritative reference brings together the collective thinking of researchers who study aging and working, and aging and careers. Summarizes key tenets of lifespan theories Draws upon theories from work and organizational psychology, organizational behavior, and human resources management Applies theories to work, organizational life and careers Examines age and work-related processes Provides an exclusive lifespan focus on work and aging Focuses on aging as a continuous intraindividual change process Published in the year 1981, Toward a Psychology of Situations is a valuable contribution to the field of Social Psychology. Das Buch dient handhabende Systematik zu entwickeln und neue Prozesse durch Verknüpfung der Grundelemente zu konzipieren und somit Energieeinsparung und Ressourcenschonung zu erzielen. Ti sei mai chiesto chi sta minacciando i tuoi dati

personali? Sono forse gli hacker incappucciati nel buio della loro cantina? O forse i grandi colossi del web, con termini d'uso scritti in piccolo e dinamiche sempre più psicotiche? Cosa sanno realmente di te i criminali informatici e quali sono i rischi che stai correndo in questo preciso momento? Una cosa è certa. La protezione dei tuoi dati è da sempre stata sottovalutata da chi dovrebbe mantenerli al sicuro. Il problema è che troppo spesso basta un solo click sbagliato ed ecco che devi subito correre ai ripari. La brutta notizia è che contare sui servizi gratuiti di sicurezza informatica, molto spesso non è sufficiente. La buona notizia invece è che se capisci come ragiona un hacker, sai anche come fronteggiare un eventuale attacco malevolo utilizzando le tecniche, le metodologie e le procedure in anticipo rispetto al tuo attaccante. Questo è l'unico modo per salvaguardare la sicurezza di tutte le persone a te vicine, siano essi i tuoi figli, i tuoi genitori, i tuoi clienti o i tuoi collaboratori. Arrivati a questo punto una domanda sorge spontanea: "Esiste un modo semplice ed efficace per difendersi nel migliore dei modi da un eventuale attacco hacker?". La risposta è sì ed è contenuta in questo libro. Al suo interno, ti sveleremo come proteggere i tuoi dati personali e salvaguardare la tua reputazione da manipolazioni informatiche grazie all'aiuto di Dottor Marc. **COS'È OGGI LA SICUREZZA INFORMATICA** Quali sono gli unici 2 modi per ottenere i dati personali di ciascuno di noi. Come capire quali sono i dati più sensibili da

proteggere. Il segreto per valutare in anticipo le eventuali conseguenze di un attacco informatico. **CHI SONO LE VITTIME PREFERITE DEGLI HACKER** Per quale motivo spendere tanti soldi in sicurezza non è una garanzia di tranquillità per le aziende. Quali sono le principali tipologie di utenti che vengono attaccate dagli hacker. In che modo un attacco hacker può rovinare in tempi lampo la reputazione di ciascuno di noi. **COME METTERE ALLA PROVA LA TUA SICUREZZA** Qual è l'unico vero modo per battere un hacker. Il metodo più efficace per testare la vulnerabilità dei propri sistemi. Per quale motivo tutti i dispositivi interconnessi alla rete locale possono essere messi alla prova con tentativi mirati di accesso. **COME PROTEGGERE I TUOI DATI** Qual è il modo più efficace per impedire gli attacchi informatici. L'importanza delle password complesse per ridurre al minimo i rischi di un accesso non autorizzato. Quali sono gli strumenti più efficaci per difendersi dai vari tentativi di intrusione. **COME DOTTOR MARC PUÒ AIUTARTI** Dottor Marc: chi è, a cosa serve e in che modo permette di ridurre al minimo i tentativi di hackeraggio. Dottor Box: cos'è, a cosa serve e in che modo permette di analizzare tutte le componenti tipiche della superficie di attacco di un'azienda. Secure Domotics: cos'è, a cosa serve e in che modo permette di analizzare le vulnerabilità dei dispositivi connessi alla rete di casa. **GLI AUTORI** Enrico Marcolini è un esperto in sicurezza informatica ed ethical hacking, specializzato

in Offensive Cyber Security e Penetration Testing. Consulente per privati, aziende e pubbliche amministrazioni negli ambiti di Incident Response, Crisis Management e Digital Forensics. Claudio Marchesini è un esperto in gestione di reti informatiche e backup sicuro. IT Network Architect e punto di riferimento per la Business Continuity, progetta e gestisce servizi di monitoraggio e mitigazione del rischio tecnologico attraverso soluzioni innovative. 1360.30 Der Band bietet einen fundierten Überblick über die Ingenieurpsychologie. Neben den psychologischen Grundlagen der Informationsaufnahme und -verarbeitung werden die Grundlagen der Systemgestaltung, die Gruppenarbeit in Organisationen, die Organisationsgestaltung und die Dienstleistungen zwischen Unternehmen behandelt. Verfahren für die Analyse, Planung und Gestaltung von Arbeit, Produkten und Systemen sowie die Aufgaben-, Arbeits- und Tätigkeitsanalyse bilden einen Schwerpunkt des Bandes. Weitere Themen sind u.a. die alter(n)sgerechte Arbeitsgestaltung sowie die Analyse und Gestaltung computergestützter interaktiver Systeme. Mittels einiger ausgewählter Anwendungsfelder, z.B. Unterstützungsmöglichkeiten für Konstrukteure oder der Gestaltung klinischer Arbeitssysteme, wird die Nutzung psychologischen Wissens für die Analyse, Planung und Gestaltung von Systemen aufgezeigt. This book constitutes thoroughly refereed post-conference proceedings of the workshops of the 16th

International Conference on Parallel Computing, Euro-Par 2010, held in Ischia, Italy, in August/September 2010. The papers of these 9 workshops HeteroPar, HPCC, HiBB, CoreGrid, UCHPC, HPCF, PROPER, CCPI, and VHPC focus on promotion and advancement of all aspects of parallel and distributed computing.

Een fascinerend inkijkje in de hackerswereld In veel Hollywoodfilms verschijnt vroeg of laat een hacker. Er flitsen wat cijfers en letters over het beeldscherm, en voilà: daar is de geheime informatie die de beveiligingscamera's uit kan zetten. Maar wat doen hackers nu eigenlijk echt? En hoe doen ze dat? Journalist Gerard Janssen kwam erachter dat ze dit niet zomaar vertellen. Maar als je wilt leren hacken, zullen hackers je altijd helpen. Janssen betrad de gesloten wereld van de hackers en ontdekte de rijke subcultuur van een even activistische als hechte gemeenschap, met één gemeenschappelijke strijd: die voor een open, vrij en veilig internet.

Hackers is een intrigerend en razendspannend boek – over vrouwelijke hackers, de kwetsbaarheid van verkiezingsuitslagen en hoe drie Nederlanders het Twitteraccount van Trump hackten. Mit dem Begriff Useware ist eine Fokussierung der Technikgestaltung auf menschliche Fähigkeiten und Bedürfnisse an der Mensch-Maschine-Schnittstelle verbunden. Das Buch hilft Entwicklern in der Industrie und Forschung mit praktisch orientierten Beispielen für Gestaltungslösungen. Eine kurze Erläuterung der menschlichen Fähigkeiten erhöht das Verständnis für die

Vorgehensweise bei der Gestaltung komplexer Userware-Systeme, die detailliert dargestellt wird.
