Germany's First Ally Feb 24 2023 Slovakia split from Czechoslovakia and formed its own state on March 14, 1939. The Slovak State was born under the auspices of Hitler's Third Reich and became its first ally on September 8, 1939, when it took part in the invasion of Poland. The Slovak army inherited its weapons, equipment, training manuals and its doctrine from the disarmed Czechoslovak Army. Though hampered by a shortage of specialists in its infantry, armor, force, armored units and artillery, it managed to field several division-strength units and sustain them during the initial three years of combat on the Eastern front. Its Mobile division fought its way all the way from the Carpathian Mountains to the Caucasus. In the last years of the war, the Slovak people became more and more disillusioned with the war and with their own fascist government. These feelings led to mounting desertions in the front-line units, and culminated in the Slovak National Uprising in August 1944. Though the uprising was liquidated after two months of bitter fighting, it gave the Slovak nation the right to join the victorious allies and be accepted as part of the restored Czechoslovakia. Though the Slovak army was by far the smallest of the armies of Germany's allies on the Eastern front, it was part of the grandiose "clash of titans" and deserves thus a place in the history of the Second World War. This book describes in detail the composition, disposition and equipment of all branches of the Slovak army (infantry, artillery, armor and air force) and its operational history through the war years.

The Making of the Slovak People's Party Sep 26 2020 Winner of the BASEES George Blazyca Prize In 1945, just six years after coming to power, the Slovak People's Party (SLS) was disbanded as a 'criminal organisation' and its leader - Jozef Tiso - hanged for treason. What made it possible for a party initially founded in 1905 by priests to represent the Catholic Slovak majority residing in the north of the Kingdom of Hungary, to form an openly pro-fascist government in 1939? And what put Slovakia on the path to a 'fascism' that would see more than 45,000 Jews deported to their deaths in 1942? To answer these questions, Thomas Lorman draws on more than a decade of research in archives across the region in Hungarian, Slovak and Latin, and studies the party's formative years in depth for the first time in English. Lorman examines the various strands which fused to form the party and its popularity, including a complex and nebulous nationalism, Catholicism and a resounding mistrust of liberalism and 'modernity'. The Making of the Slovak People's Party is a vital and timely study of the genesis and success of far-right movements that will be essential reading for all scholars working in 20th-century Eastern European history, nationalism and the interplay of religion and politics.

The Slovak Dilemma Dec 18 2019 The Slovak Dilemma is a case-study in nationalism. Accepting the view that the four and a half million Slovaks who inhabit the eastern part of Czechoslovakia are a separate Slav ethnic group, Dr Steiner describes their position in Czechoslovak history, their role in its political life, the extraordinary persistence and continuing frustration of their national aspirations. After a brief survey of the history of the Slovaks

Hungarian rule, Dr Steiner examines their position in the democratic Czechoslovak Republic which was established in 1918. He analyses the of Slovak discontent and shows that although the new constitution granted expression to Slovak culture, it limited complete development of Slovak national rights. Nevertheless he suggests that Slovak separatism played part in the dismemberment of Czechoslovakia in 1938 and that the real attitude of the people towards Hitler's puppet Slovak State was eloquently expressed in their tragic rising against it in August 1944.

Contract Law in Slovak Republic Apr 02 2021 Derived from the renowned multi-volume International Encyclopaedia of Laws, this practical analysis of the law of contracts in the Slovak Republic covers every aspect of the law – definition and classification of contracts, contractual liability, relation to the law of property, good faith, burden of proof, defects, penalty clauses, arbitration clauses, remedies in case of non-performance, damages, po

attorney, and much more. Lawyers who handle transnational contracts appreciate the explanation of fundamental differences in terminology, application, and procedure from one legal system to another, as well as international aspects of contract law. Throughout the book, the treatment emphasizes drafting considerations. An introduction in which contracts are defined and contrasted to torts, quasi-contracts, and property is followed by a discussion of the concepts of 'consideration' or 'cause' and other underlying principles of the formation of contract. Subsequent chapters cover the doctrines of 'relative effect', termination of contract, and remedies for non-performance. The second part of the book, recognizing the need to characterize an agreement as a specific contract in order to determine the rules which apply to it, describes the nature of agency, sale, lease, building contracts, and other types of contract. Facts are presented in such a way that readers unfamiliar with specific terms and concepts in varying contexts will grasp their meaning and significance. Its succinct yet scholarly nature, as well as the practical quality of the information it provides, make this book a valuable time-saving tool for business and legal professionals alike. Lawyers representing parties with interests in the Slovak Republic will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative contract law.

The economic development of the Slovak Republic from post-Soviet control to present day. An Economic Analysis 04 2021 Seminar paper from the year 2015 in the subject Economics - Case Scenarios, grade: 1,3, University of Applied Sciences Berlin, language: English, abstract: This paper explores the economic development of the Slovak Republic from post-Soviet control to present day. The following paper explores the recent economic development of the Slovak Republic, from its accession into the European Union in the early 2000s, throughout the European monetary crisis in the years 2008-2009 and finally reflects upon the country's current economic state. In addition, so, this paper analyzes the most relevant indicators of international and domestic economic well-being and describes some of the underlying factors for these developments. An analysis of the degree to which Slovakia has overcome the hardships imposed by the economic crisis is also presented.

analyses in this paper rely on statistical information available from public databases and, when applicable, consultation of expert literature for a correct interpretation of the data. When doing so, the author has attempted to use the data for comparison and context, generally with the average from the EU member states or of the other Visegrád Group members, when available. This paper only considers a limited number of indicators of economic well-being for the analyses: balance of payments, openness, foreign direct investment, government deficit and debt, inflation, economic growth, employment, and investment. As a result, some other economically relevant topics may be excluded which could provide an even better analysis of the problem. Social costs and other non-economic factors are entirely omitted from this paper, although they play an important role in any country's standard of living. Finally, it is important to note during the analysis of the developments in the 2008-2009 and the years afterward that all changes cannot be attributed to the 2008 Debt Crisis as another important event occurred: Slovakia adopted the Euro as its national currency; an event that is often cited as causing initial inflation.

Slovak Republic Short History of Slovakia After the end of the 5th century a major part of Central Europe was dominated by Slavs (Slovaks). They had already in the 7th century settlements in the vicinity of towns Bratislava, Devín, Nitra to create the Slovak's state formation with the name "The Empire of Sam", territory of which corresponded to that of Slovakia of present day. (The Empire of Sam was also the first state formation in the Central Europe of present states Czech Republic, Poland, Hungary, Slovakia etc.) Very important town of this state was Nitra, with the biggest Castle in the Central Europe with his Duke Pribina. The first Church of the Central Europe was built here in the year 830, and it is now considered to be the "Slovak Bethlehem". In the year 880, Nitra also became the first Office of Bishop. Later, the Slovak Duke Pribina and Moravian Duke Mojmir (Moravia corresponded to eastern part of the present Czech Republic) joined the

formations to common state "Greate Moravian Empire". The strongest the Great Moravian Empire was Svatopluk (864 A. D.), who spread his empire over Czech Republic, Hungary and part of Poland, Ukraine and eastern Germany of present, which at that time still did not exist as formations.

Slovenská nová vlna Feb 18 2020 This publication presents eight Czech photographers of Slovak origin working in Prague in the 1970s and 80s: Stanó, Rudo Prekop, Vasil Stanko, Martin Strba, Miro Svolík, Kamil Varg, Peter Zupník and Jano Pavlík, known collectively as "the Slovak New Wave". The group--described variously as "photographers living in Bohemia" or "Czech photographers of Slovak origin"--constitutes a kind of shared cultural asset for both countries and an interesting phenomenon for anyone studying the links between Czech and Slovak photography. In the 1970s and 1980s FAMU was the only higher-education establishment in Central Europe to teach photography, and it is perhaps surprising that the members of the Slovak New Wave remained uninfluenced by the Czech photographic tradition and were able to create their own unique identity at FAMU. Despite--possibly because of--the fact that this was never an organized group with a declared statement of purpose, their relatively homogeneous visual language became one of the first examples of postmodernism in Czechoslovakia. This volume gives special emphasis to works that were never exhibited at home or were shown only on the fringe of the scene.
